LSEG Knowledge Direct API – Digital Solutions

Transform the Web-based information services you deliver

The LSEG Knowledge Direct API seamlessly integrates all channels to deliver unrivalled financial content, optimised for your workflow.

### Unrivalled cross-asset financial content, news and insight

Knowledge Direct is a scalable digital delivery platform that provides access to leading cross-asset content, news and insight.

It offers deep and timely company data across developed, emerging and frontier markets, access to global market pricing and Reuters news, broad economic time series content and fund performance data.

LSEG DATA & ANALYTICS

This is the essential information you need to power better decision making.

LSEG Economic Indicators is a comprehensive collection of global economic content, with a clear emphasis on factors that affect global financial market performance. LSEG Data & Analytics is the exclusive provider of Reuters Polls and LSEG StarMine SmartEconomics consensus data, which provides analytics and predictive financial modelling designed to improve investment and trading decisions and help manage risk to achieve higher returns.

Spot global trends and opportunities, and perform deep investment analysis with company data that covers 99% of the world's market cap. We provide access to the largest coverage of companies across an extensive portfolio of content, including fundamentals, LSEG I/B/E/S estimates, filings, events, business intelligence, corporate actions, transcripts, ownership and people.

Generate new investment ideas and take advantage of opportunities with our proprietary insights, analysis and ratings from LSEG Stock Reports Plus, LSEG ETF Reports Plus and other data sets.

Never miss financial, economic and geopolitical developments that drive prices and global markets. We offer in-depth insights for better financial decisions, real-time news in 13 languages, top news, significant developments and newsletters complemented by more than 40 third-party news sources – including exclusive access to Reuters news.

Access global real-time feeds covering more than 350 exchange-traded and over-the-counter markets. This includes equity and futures pricing, foreign exchange data (including cryptocurrencies), LSEG indices, fixed income and commodities, complemented by intraday and historical time series.

Optimised for your digital workflow

Optimised data solutions from exchanges, trading venues and liquidity pools worldwide are specifically designed for use in Web environments. Data is seamlessly integrated into your advisor desktop, employee intranet, customer-facing investment portals and online trading platforms.

Search

Easily search financial reference information by major international and local coding schemes for financial instruments.

Charts

Used to retrieve a wide range of technical charts and tabular displays, generated live. From 10 days' intraday history to 20 years' intraday history, with more than 25 indicators available.

Quote list

Retrieve prices on multi-instrument and multi-field quote lists with a single request. Quote lists can be saved on the LSEG Data & Analytics server.

Portfolio tracker

Create, maintain, view and analyse portfolios and their multicurrency instruments using the latest prices and FX rates.

Scalable delivery and value-added service

Designed for digital portals and Web environments, including customers redistributing content on browser-based or mobile applications, Knowledge Direct provides simplified and cost-efficient delivery via industry-standard SOAP-based (XML/JSON) Web services. Our hosted environment offers different update frequencies, including streaming and snapshot as well as real-time, delayed and end-of-day data.

Customer and developer tools are also offered – these include a content catalogue and API examples to support rapid development, as well as a range of value-added capabilities and customised solutions delivered through our technical partners.
