

Human generated. Machine readable.

See beyond with our Financial News Service

See the full picture with LSEG's AI-ready Financial News Service. Our enriched news offering enables unmatched opportunity identification, powers alpha generation, and supports risk and compliance processes across the trade lifecycle where news feeds are critical.

Gain actionable insights from our comprehensive global coverage, including exclusive access to trusted Reuters news that moves markets. See the news as it breaks, explore 30+ years of historical news archives and fuel insights with rich commentary, analysis and more.

Benefit from content enhanced for both humans and machines that helps you stay on top of events as they unfold. We normalise and enrich the news with our leading metadata, tagging and translation capabilities. As a result, our search capabilities enable discoverability, analytics, and business processes and algorithms to be used by firms around the globe.

Amplify the value of your news and pair it with relevant content sets such as Tick History, filings, transcripts and other LSEG data. Bring together structured and unstructured data and discover hidden insights efficiently.

Incorporate news that's AI-ready whenever, wherever and however you need it – from low-latency broadcast feeds to deep archives, from APIs to MCPs, delivery is tailored to your needs. Fuel your activities with trusted, authoritative, original news reported by humans and published in machine-readable format to optimise your workflows.

Reuters News

Produced for financial firms—trusted, market-moving journalism for trading, research and risk teams, delivered at speed and at global scale.

At the heart of our Financial News Service is Reuters—authoritative, objective reporting designed to help professionals act with confidence. From breaking headlines and market-moving exclusives to analysis, investigations and commentary, you get a complete view of what's happening now — and what it means next.

Coverage spans the catalysts and asset classes that move markets: politics, economics and central banking; companies and industries; banking and finance; commodities; foreign exchange; fixed income; and equities. Content is produced worldwide and delivered in multiple languages.

Produced for financial firms

- **Trading & execution (incl. hedge funds):** move faster on catalysts with clear headlines, rapid updates and context that supports time-critical decisions across macro and single-name books.
- **Research & strategy:** support fundamental and long/short research with analysis, investigations and commentary—helping teams connect developments to themes, sectors and issuers.
- **Risk monitoring:** stay ahead of geopolitical, macro and company-specific developments—supporting portfolio risk reviews, event risk monitoring and scenario awareness.
- **Internal & investor updates:** keep PMs, analysts and stakeholder-facing teams aligned with timely, credible narratives on markets, sectors and key issuers.

Why Reuters

- **Global scale that reduces blind spots:** 2,600 journalists with boots on the ground in 165 countries, delivering news in 12 languages.
- **Trust you can defend:** Reuters is guided by the Trust Principles—integrity, independence and freedom from bias—supporting confident decision-making.
- **Actionable depth, not just headlines:** breaking coverage complemented by analysis, investigations and commentary—so teams can move from awareness to conviction.

Broader coverage—curated from 140+ additional sources

Complementing Reuters is a curated selection of 140+ third-party sources, including AI generated news briefs. This broadens visibility into issuer and regulatory communications—capturing announcements and disclosures from public websites, newswires and regulatory feeds.

Entity coverage roadmap

We are expanding entity coverage beyond public companies to include **60,000 private companies** and **30,000 investment firms**—building towards a combined target of **90,000 entities**. This coverage is being added progressively ~2,100 companies per month, commencing February 2026.

Time period	Addition rate	Notes
Feb 2026 – Sep 2026	2,100 entities/month	Initial ramp for private companies and investment firms coverage
Oct 2026 onward	4,200 entities/month	Accelerated expansion until reaching the 90,000-entity target

Roadmap targets, timelines and monthly addition rates are planned and may change based on data availability, licensing and operational considerations.

Key figures at a glance

2,600	Reuters journalists on the ground across 165 countries
12	Languages available (licensing and delivery varies by product)
4M+	Unique Reuters news stories delivered each year

We'll help you choose the right mix of Reuters News and additional sources for your workflows—whether you're optimizing for faster breaking news, deeper context, or broader issuer and regulatory coverage.

LSEG's News Feeds

News engineered for markets: ultra-low latency delivery, rich metadata, and formats built for trading, research and risk workflows.

Choose the latency and structure you need—from fastest machine-readable headlines for event trading, to full-text real-time news with metadata, analytics-ready NLP signals, and a deep historical archive. Deploy across portals, algorithms, surveillance, and downstream applications.

Our Financial News Service is enriched with:

- **News analytics** – Metadata is added to news stories, including measurement of sentiment, additional keywords for search, social media tags, most read, and relevance and confidence scores. Crowd-sourced, expertly informed metadata helps identify relevant content and creates context around its meaning.
- **Intelligent topic tagging** – Our vast content is simple to navigate using the world's most intelligent metadata system combined with tagging, search and curation of the top stories to enable our customers to know and act first.
- **Advanced search** – Sophisticated request-response search capabilities are a part of the News API. Individuals can query specific fields or use free text searches to discover the information they need.

The application of these technologies supports the creation of the insights and training of machine learning models to support more efficient and effective decision-making across a range of scenarios.

Choose your feed

Deploy the news you need in the way that suits your use case. Our content is available in multiple latencies, formats and delivery channels empowering portals, machines and financial applications. Solutions include:

Headlines Direct — our fastest, lowest-latency, machine readable headlines feed designed for event-driven strategies.

- **Best for:** hedge funds running event trading, news-reactive execution, and automated alerting.
- **What you get:** Reuters and third-party headlines in a compact, machine-readable format; archives available on request.
- **Delivery:** delivered at the New York trading centre for lowest latency.

Real-Time News — structured, ultra-low latency full-text news powered by Reuters, with metadata for machine processing.

- **Best for:** cross-asset trading desks, research platforms, and risk teams that need full story text with structure.
- **What you get:** headline + story body + metadata from Reuters and third-party sources, including press releases and regulatory wires.
- **Delivery:** connections available in global locations.

News Analytics — LSEG is the exclusive provider of automated Reuters News Analytics with a particular focus on equities and commodities & energy. Coverage includes 40,000 companies in English, and 6,000 companies in Japanese. Natural Language Processing (NLP) enables measurement of company sentiment, relevance and novelty of text, along with other valuable metadata that can enrich signal detection.

News via our data platform — structured news with intelligent topic tagging and analytics, designed for integration into data platforms and applications.

- **Best for:** firms standardising ingestion into enterprise data platforms and downstream apps.
- **What you get:** Reuters news plus a broad mix of newswires and exchanges, enriched with topic tagging and analytics from LSEG Data & Analytics machine learning applications.
- **How it helps:** improves discoverability, routing, and automation across teams and systems.

News Archive — deep, point-in-time historical news for back-testing, research, and model development.

- **Best for:** hedge funds and banks back-testing news-driven strategies; researchers studying event impact; teams training and validating models.
- **What you get:** Reuters news from 1996 to present, plus third-party news from 2003 onwards, delivered as a point-in-time archive.
- **Designed for data:** normalised with symbology and common field identifiers; consistent tagging and topic codes across time.

Amplify your news with LSEG data

Combine news with market data to back-test faster, validate signals, and manage event risk across the trade lifecycle. Pair real-time news or archive content with LSEG datasets to unlock deeper insight.

Tick History

What it adds: a normalised, global intraday history of time & sales, quotes and market depth dating back to January 1996—enabling rigorous event studies and back-testing when paired with timestamped news.

[Find out more about Tick History](#)

Tick History – PCAP

What it adds: lossless, nanosecond-timestamped exchange data (Levels 1–3) in raw and normalised formats—ideal for research teams aligning microstructure signals with news timing. [Discover](#)

[Tick History – PCAP](#)

Real-Time – Optimized

What it adds: a cloud-based, all-trade, quote conflated feed that teams can combine with machine readable news to enhance signal detection—supporting event-based trading around economic releases and major corporate news.

How financial firms use LSEG's Financial News Service

From hedge funds to global banks, teams use our news feeds to move faster from headline to decision—powering trading, research, surveillance and risk workflows with trusted Reuters journalism, broad source coverage, and analytics-ready metadata.

Programmatic Trading

- **React at machine speed:** route machine-readable headlines into execution and alerting logic.
- **Improve signal quality:** combine timestamped news with real-time market data to reduce noise and sharpen triggers.
- **Train with confidence:** build and validate models using point-in-time archives alongside historical tick data going back to 1996.

Research

- **Find the narrative fast:** surface original, authoritative relevant stories with intelligent topic tagging, metadata and advanced search.
- **Spot themes and catalysts:** track frequency of mention, co-mentions and sentiment to identify opportunity and risk.
- **Scale insight creation:** support research workflows with AI-assisted summarisation and draft generation (where enabled) grounded in trusted news.

Back-testing & Model Development

- **Point-in-time integrity:** use millisecond-precision timestamps to avoid look-ahead bias in event studies.
- **Data built for quants:** normalised fields, symbology and consistent tagging across time.
- **End-to-end testing:** pair news archives with Tick History or PCAP data to measure market impact and execution outcomes.

Market/Trade Surveillance

- **Connect events to activity:** correlate news with orders and trades to accelerate investigations.
- **Reduce false positives:** use high-quality, point-in-time data to add context to alerts and improve triage.
- **Support surveillance uses:** enhance monitoring for insider trading risk, manipulation patterns and abnormal trading behaviour.

Risk Management

- **Earlier warning signals:** get timely notifications on macro, geopolitical and issuer-specific events.
- **Broader risk lens:** monitor themes such as supply chain disruption, ESG, filings, regulatory change and corporate actions.
- **Turn news into decisions:** combine sentiment and relevance signals with positions, exposures and market data to prioritise action.

Workflow Automation

Automate repeatable steps—triage, routing, summarisation and briefing—using capabilities that combine trusted Reuters news with your proprietary data, so teams can spend less time searching and more time deciding.

Know more. Move faster.

Get the right news to the right teams at the right time—so you can anticipate market impact, react with speed, and strengthen compliance across the trade and investment lifecycle. With exclusive access to Reuters news, alongside 140+ third-party sources, financial firms across the globe deploy our news service across a wide range of use cases. Intelligent topic tagging, metadata and advanced search enable firms to discover fresh insights and act quickly to mitigate risk, as well as add and preserve value.

Know more, faster with our Financial News Service; anticipate market impact, react with speed, and ensure compliance across the trade and investment lifecycles.

Pairing our Financial News Service with other LSEG datasets, helps to derive value faster – benefiting from normalisation, symbology and other features.

Speak with one of our experts to learn how we can help you achieve your business goals and address a range of use cases.
