

Reuters Super Summaries

LSEG launches a new AI-assisted format from Reuters substantially expanding company news coverage

LSEG has launched Reuters Super Summaries, delivering crucial, market-moving company events concisely summarised at speed to gain a competitive edge and make critical investment decisions.

Reuters Super Summaries are a new AI-assisted format that expand the scope of LSEG's company news coverage down the market capitalisation stack. A hybrid of human and machine intelligence, Super Summaries uniquely combine trusted journalism and insights from Reuters with analysts' estimates and market data from LSEG.

Reuters currently delivers in-depth reporting on numerous companies across the world's major stock indices, such as the S&P 500. Super Summaries target additional firms with initial coverage centred on company earnings for 3,500 US and Canadian businesses by year-end. The scope of global coverage is expected to expand over time to encompass 10,000 companies.

Content format

The story format consists of six sections – story headline, overview, outlook, result drivers, key details and analyst coverage. New features and sections will be added over time.

Blending the best of Reuters trusted journalism, LSEG data and technology

Reuters is continuously innovating with new formats to deliver financial news faster and to improve the accessibility and value of content delivered to the financial community. Super Summaries combine the best of Reuters human insights and technologies with LSEG data.

Expanding the range of company news formats

Reuters journalism and financial insight empowers the financial community with essential information and tools to make informed decisions. The Super Summary format is designed to augment Reuters existing company news coverage. It will enable the newsroom to deliver structured insights at scale, faster than ever before, and to provide timely, digestible and actionable content for financial professionals.

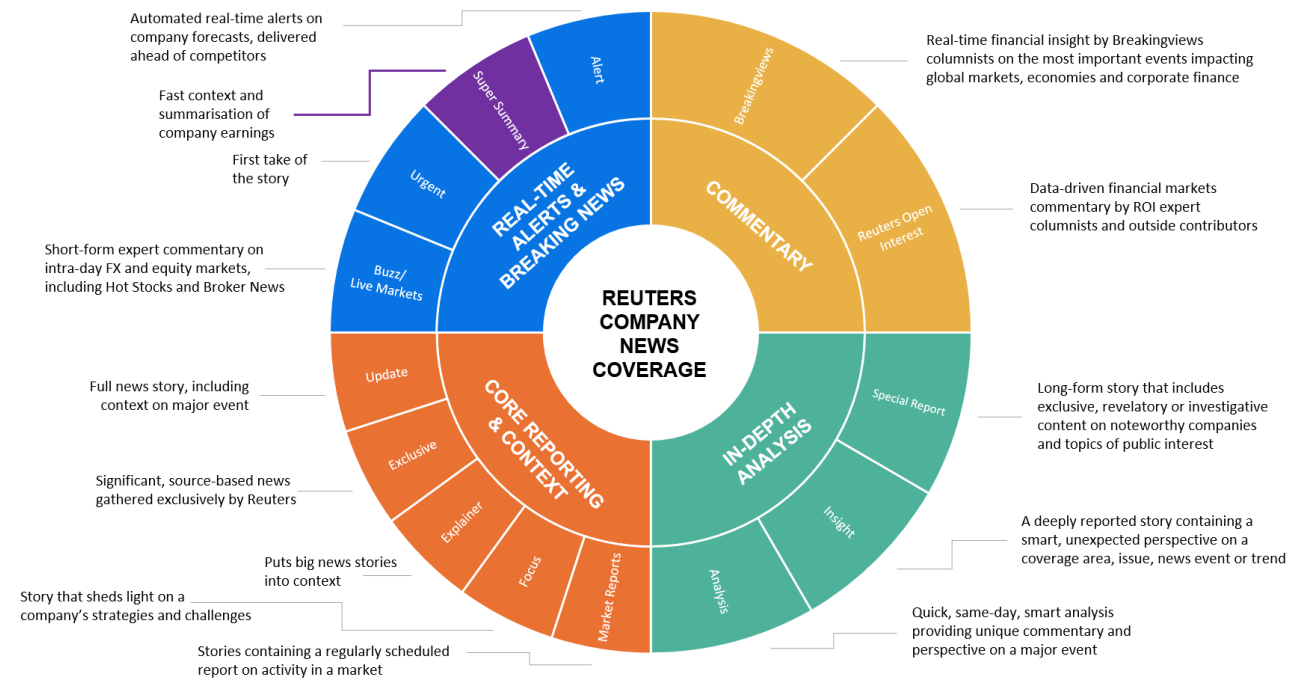

Editorial oversight and transparency

While Super Summaries leverage AI automation, every item is overseen by Reuters journalists and editors before publication to ensure accuracy, relevance and alignment with Reuters editorial standards. The format will include disclosures to provide transparency to users about the role of AI in the creation of the content, in line with Reuters Trust Principles.

Key benefits

Breadth	Speed	Trust and transparency	Synthesis	Easy to read	Context
Expanded earnings coverage on a wider universe of companies	Consolidation of pertinent information minutes after earnings are released	Transparent use of AI combined with Reuters editorial expertise and oversight	Summarisation of key earnings information plus fast context – all from a single source	Presented in a visually appealing, easy-to-digest format with an emphasis on brevity	Combining LSEG market data and Reuters insight for clear, decisive action

How Super Summaries fit into Reuters company news coverage

How to access Reuters Super Summaries

Reuters Super Summaries can be found alongside company alerts. Simply type code SSUM in News Monitor on LSEG Workspace and are also available via LSEG news feed services.
