

Multi-Asset Trading Solutions

Front-to-back investment workflows for hedge funds and asset managers

Hedge funds and asset managers are increasingly operating across more strategies, asset classes, counterparties and trading venues. As the operating model expands, disconnected systems can create duplicated processes, inconsistent data and fragmented oversight.

LSEG Multi-Asset Trading Solutions brings together research and intelligence, portfolio and order management, multi-asset execution, market connectivity and liquidity discovery, analytics and reporting within a connected front-to-back workflow.

Integrated LSEG market data, including reference data, pricing data, tick data, fundamentals, supports the workflow from idea generation and portfolio construction to execution, reporting and operational oversight.

Built around how hedge funds and asset managers change

Launching a new strategy

Establish an operating model that can support portfolio construction, order management, execution management, compliance and operational oversight from the outset, without building a fragmented technology stack.

Scaling an existing book

Add new asset classes, counterparties, users and workflows while retaining consistent controls and a common view across portfolio and execution activity.

Consolidating trading workflows

Bring together execution, automation, broker connectivity and liquidity access within a more integrated environment.

Aligning risk management and oversight

Support portfolio managers, traders, operations and compliance teams with shared data, positions, workflows and controls across the investment lifecycle.

Research, intelligence and collaboration

LSEG Workspace supports market data, analytics, AI-enabled research and collaboration upstream of portfolio and execution workflows.

LSEG Deep Research

Applies AI to trusted financial data, news and analytics to help investment professionals investigate complex questions, generate ideas and validate findings within their existing LSEG Workspace workflow.

LSEG Open Directory

Available through LSEG Workspace in Microsoft Teams, supports secure cross-firm communication and collaboration between financial services professionals.

A connected investment and trading workflow

Market insight & analytics

LSEG Workspace supports decision and intelligence including research, analytics, portfolio insight and AI-assisted investment workflows

Portfolio and order management

LSEG AlphaDesk supports hedge funds and asset managers across portfolio management, order management, compliance, order routing, execution, risk, accounting and investment operations within a cloud-based environment.

Pre-trade liquidity discovery

LSEG Autex IOI supports liquidity discovery through indications of interest and trade advertisements, helping traders identify potential liquidity before execution.

Execution workflows

- REDI on Workspace - human-led execution workflows without leaving Workspace
- LSEG TORA - extended OEMS supporting multi-asset trading, broker connectivity, systematic workflows, API-driven automation, spread trading and advanced execution strategies.

Broker connectivity

LSEG Autex Trade Route provides institutional connectivity between buy-side firms, brokers and trading venues.

The wider LSEG liquidity ecosystem includes LSEG FXall and Tradeweb, supporting access to FX and fixed income markets within the broader multi-asset workflow.

Integrated LSEG market data

Pricing, fundamentals, reference data and tick data support research, portfolio, execution and reporting workflows.

Open, interoperable and designed to extend

LSEG Multi-Asset Trading Solutions can support firms that want to adopt a complete workflow or connect selected capabilities into an existing operating model.

APIs, FIX connectivity and integration with third-party systems allow firms to extend workflows without requiring every component to be replaced at once.

This enables firms to:

- Connect portfolio and execution workflows
- Support systematic and API-driven trading
- Access brokers, venues and liquidity across asset classes
- Introduce new strategies and account structures
- Strengthen controls and operational oversight
- Support scaling trade operations while maintaining consistency
- Use integrated market data and analytics consistently across portfolio, execution and reporting workflows

Build the operating model around the workflow

Whether launching a strategy, scaling a book or consolidating an existing environment, LSEG can help identify the combination of portfolio, execution and connectivity capabilities suited to the firm's operating model.

About LSEG Multi-Asset Trading Solutions

LSEG Multi-Asset Trading Solutions helps hedge funds, asset managers and other institutional investment firms connect research and collaboration, portfolio and order management, multi-asset execution, market connectivity and liquidity discovery across the investment workflow.

Integrated data underpins the workflow, helping portfolio managers, traders, operations and compliance teams work from more consistent information across the investment lifecycle.
