

LSEG TORA

Multi-Asset Execution Management for Institutional Trading Teams

LSEG TORA provides institutional trading teams with a unified cloud-based execution environment across equities, derivatives, FX, fixed income and digital assets. Manage execution, order management, spread trading, compliance and API-driven workflows while maintaining real-time oversight and control.

Built for:

- Hedge funds
- Asset managers
- Outsourced trading desks
- Prime broker execution services
- Systematic trading teams
- Proprietary trading desks

Key Features

Multi-Broker Connectivity

- Connect to over 600 brokers and execution destinations through LSEG Autex Trade Route, one of the world's largest trading networks.

Systematic & API-Driven Trading

- Support automated workflows through FIX and WebSocket APIs, proprietary models and external OMS/PMS integrations.

Rules-based Trading

- Automated trading for light-touch and zero-touch workflows

Spread & Relative-Value Trading

- Execute equity pairs, futures spreads, EFPs and cross-asset relative-value strategies with integrated workflow controls. Control individual legs independently, automate hedging and floating legs, manage participation and connect proprietary signals through APIs.

Compliance & Oversight

- Maintain real-time monitoring, audit trails, workflow controls and execution oversight across the trading lifecycle. Apply configurable pre-trade rules, restricted-list controls and approval workflows, including API-based approval and rejection for external systems.

Full Trade Lifecycle & Analytics

A connected investment and trading workflow

Market Insight & Analytics

LSEG Workspace supports decision and intelligence including research, analytics, portfolio insight and AI-assisted investment workflows

Portfolio and Order Management

LSEG AlphaDesk supports hedge funds and asset managers across portfolio management, order management, compliance, order routing, execution, risk, accounting and investment operations within a cloud-based environment.

Pre-trade Liquidity Discovery

LSEG Autex IOI supports liquidity discovery through indications of interest and trade advertisements, helping traders identify potential liquidity before execution.

Execution Workflows

- REDI on Workspace - human-led execution workflows without leaving Workspace
- LSEG TORA - extended OEMS supporting multi-asset trading, broker connectivity, systematic workflows, API-driven automation, spread trading and advanced execution strategies.

Broker Connectivity

LSEG Autex Trade Route provides institutional connectivity between buy-side firms, brokers and trading venues.

The wider LSEG liquidity ecosystem includes LSEG FXall and Tradeweb, supporting access to FX and fixed income markets within the broader multi-asset workflow.

Integrated LSEG Market Data

Pricing, fundamentals, reference data and tick data support research, portfolio, execution and reporting workflows.

Systems Connectivity

LSEG TORA connects with LSEG AlphaDesk and supported third-party OMS, PMS and investment management systems.

Implementation, Support & Professional Services

LSEG provides implementation, integration and workflow design support to help firms deploy LSEG TORA efficiently and align the platform with their operating model.

- Workflow design
- Connectivity onboarding
- Data Migration
- Training
- Change management
- Technical support

About LSEG TORA

LSEG TORA helps institutional trading teams automate workflows, connect to global liquidity, manage execution risk and maintain oversight across the trade lifecycle. Available as a standalone OEMS or as part of the broader LSEG buy-side workflow ecosystem, LSEG TORA supports firms from launch to institutional scale.
