

Real-Time Managed Distribution Service

Product Options

Product Options

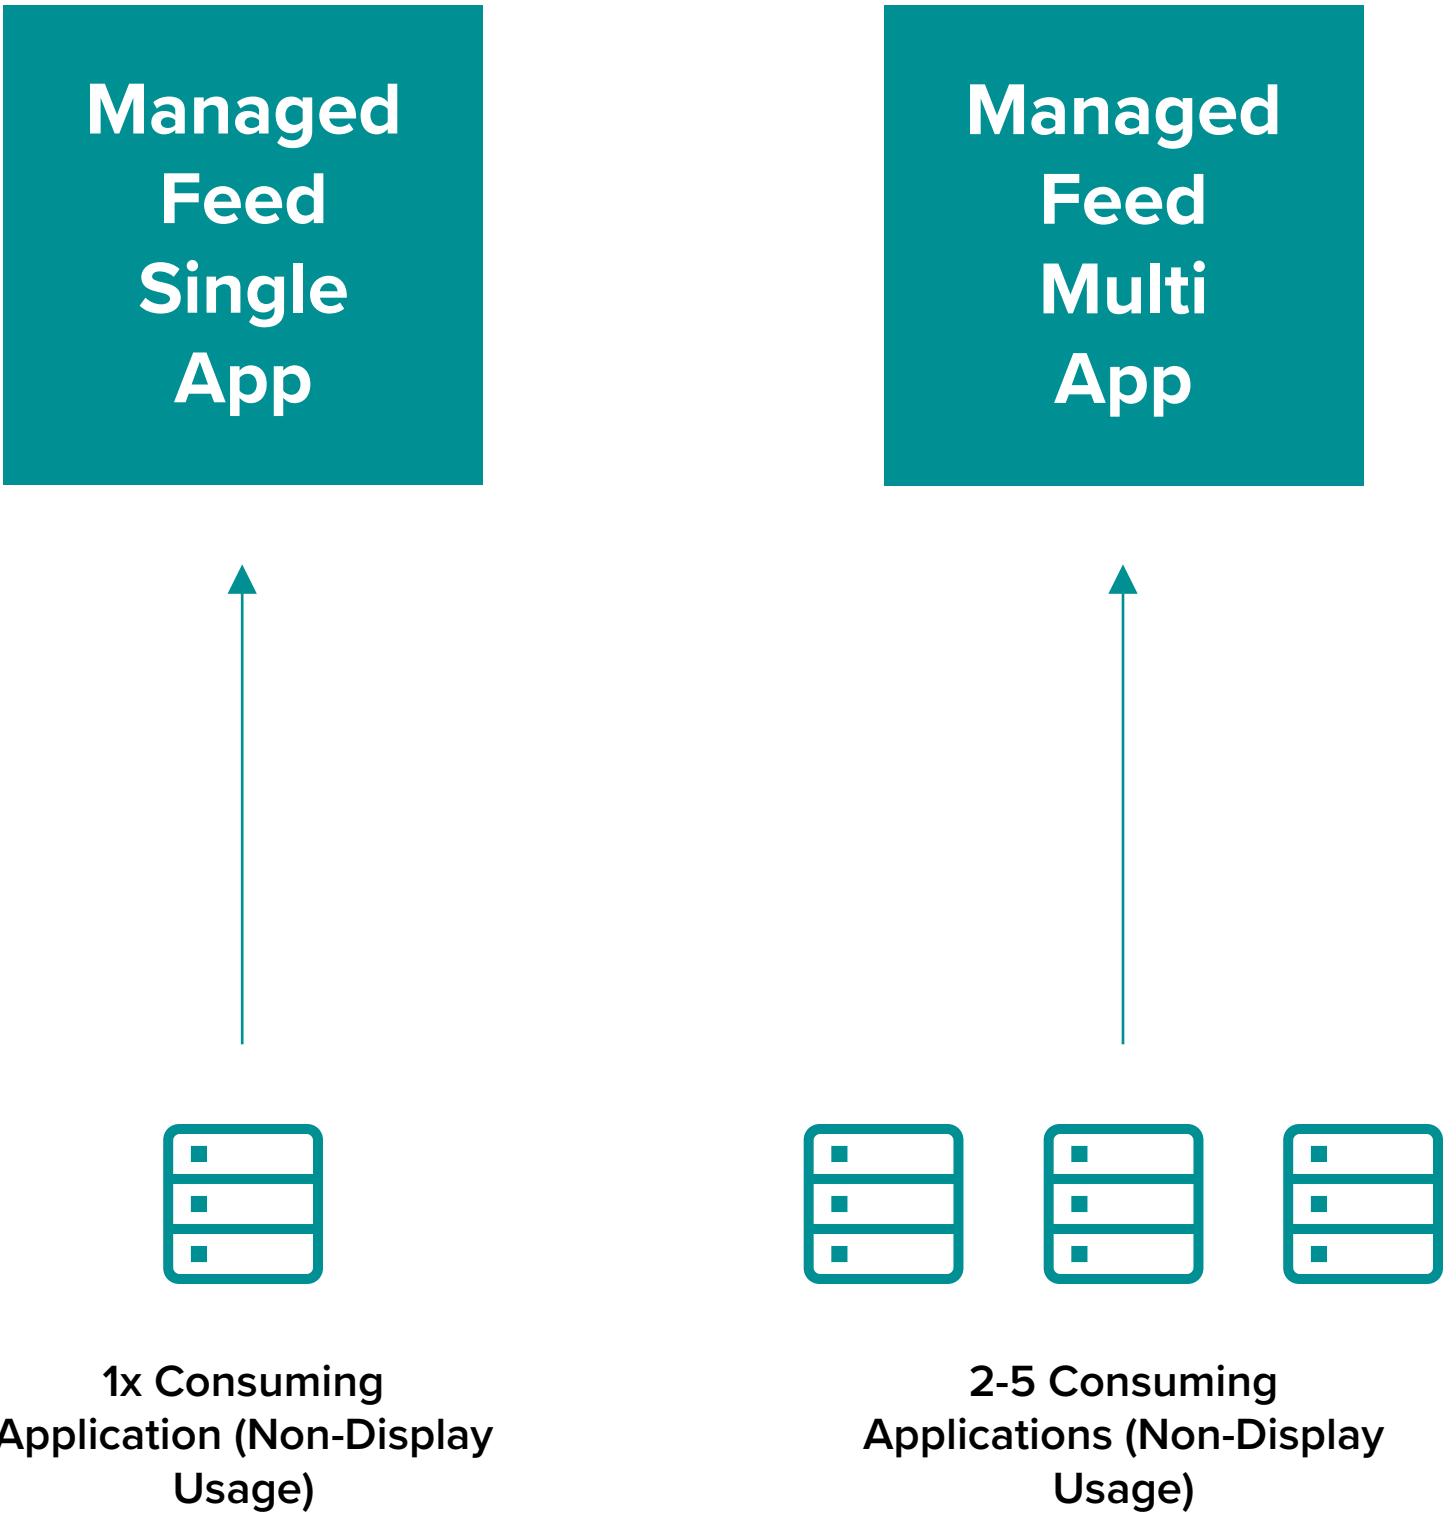

Power innovation, increase efficiency and lower costs with Real-Time Managed Distribution Service. Whether you need a fully-managed market data environment, access to high-quality market data via an internet connection or to power an application deployed in the public cloud, our managed services solution adapts to your business environment. You can choose from our standalone modules or as part of a larger managed-services offering, and leverage our strategic strategic points of presence (PoPs) all around the world. Access Real-Time feeds and our platform to run your applications and market data environment with full transparency and control.

*Real-Time Managed Distribution Service can also have a bespoke configuration, please reach out to our team so we can discuss how best to support your needs and use cases.

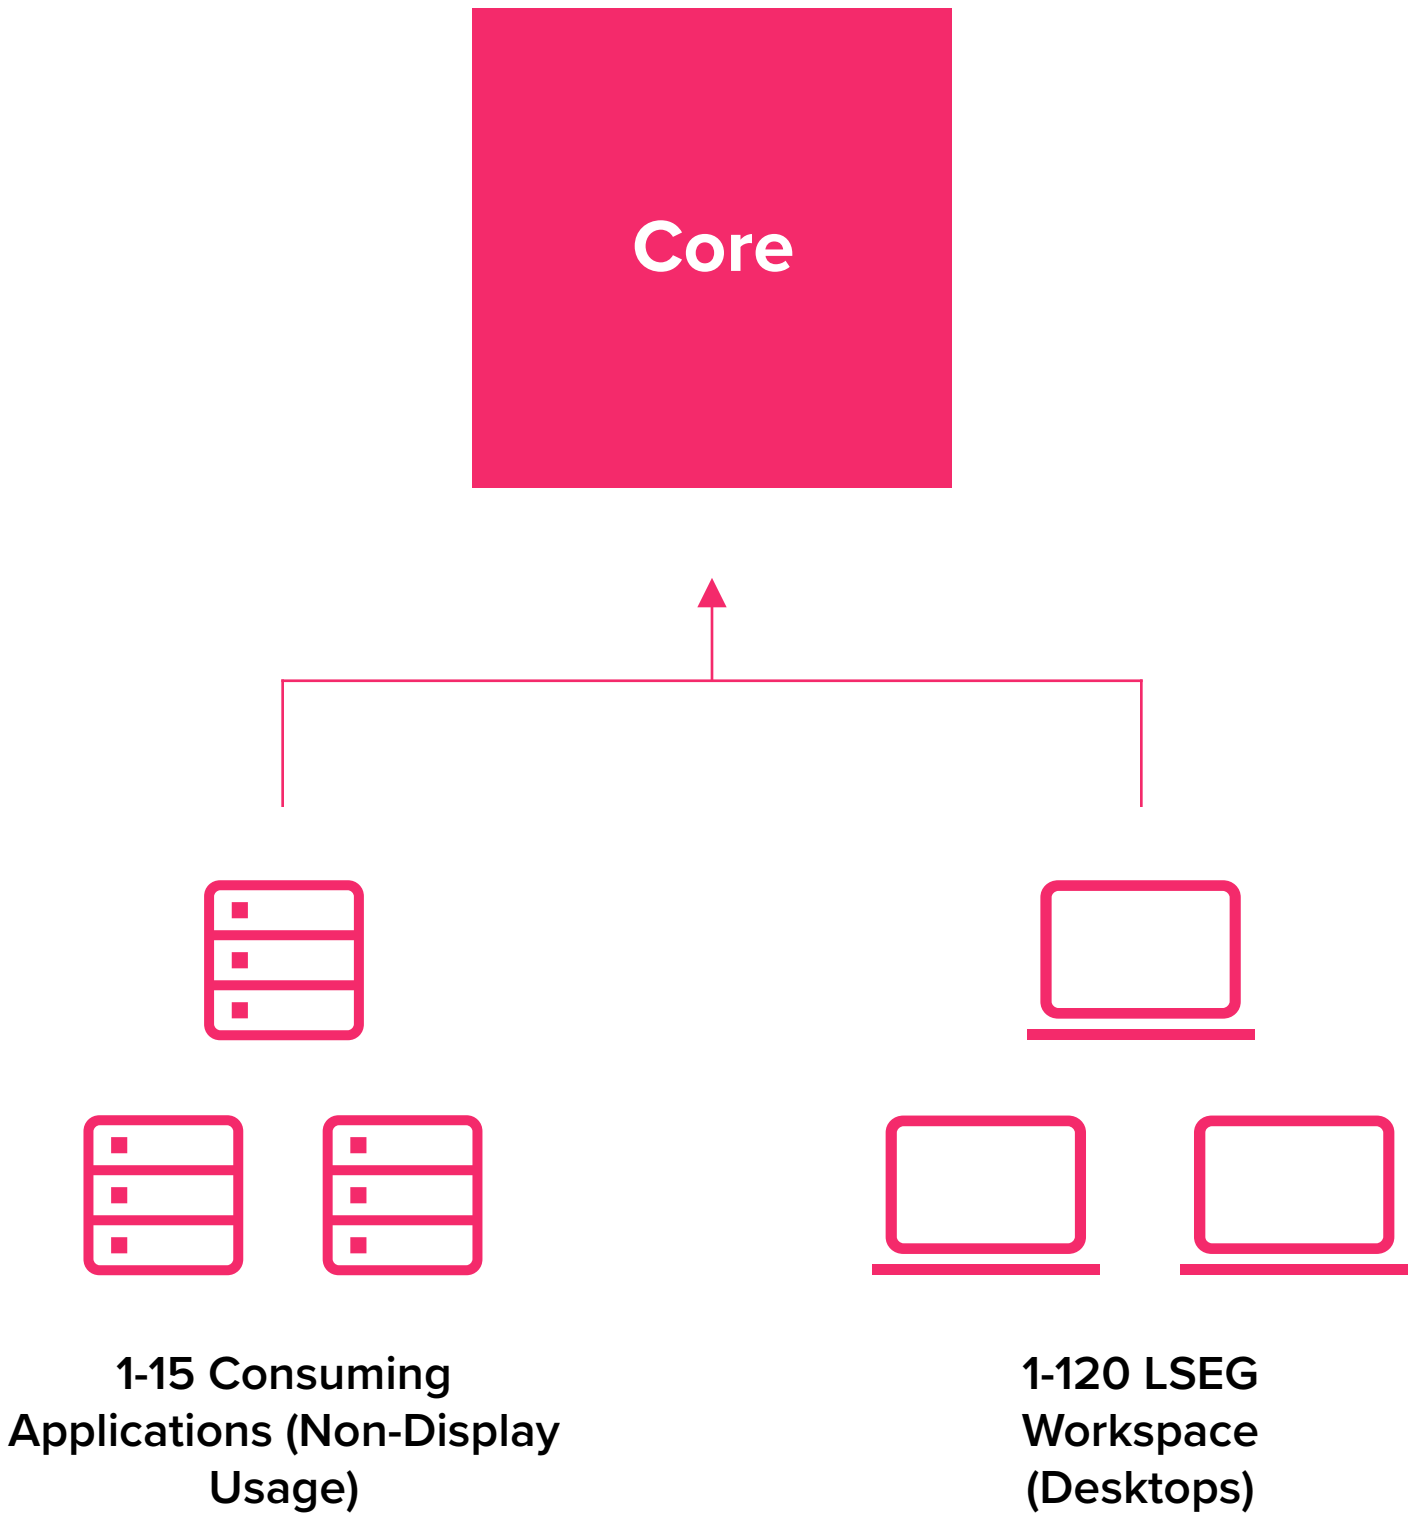

Real-Time Managed Distribution Service – Managed Feed

Number of Instruments	Over 500k instruments to applications
Types of market data feeds	<ul style="list-style-type: none">• Full tick• Predefined conflated feeds (500ms, 1s, 2s non trade-safe)
Configuration options	Pre-defined configuration
API support	All supported APIs (including legacy until EOS date)
Connectivity options	<ul style="list-style-type: none">• Leased Line: LSEG Delivery Direct• Cross-connect: LSEG R-XCU• Internet: R-VPN• Cloud: Managed Extranet for Cloud (MEC) into AWS, Azure and GCP
Deployment model	Private Cloud
Disaster recovery	No DR
Contributions	No contributions
Data transformation	No data transformation
Resiliency	Resiliency within PoP as standard
Service monitoring and alerting	Measurable service with health reporting
Service management	Standard Service Management oversight
Deployment automation	Highly automated deployments
Time to market	3-4 weeks
Integration resources required	Self-Service / No SMEs needed

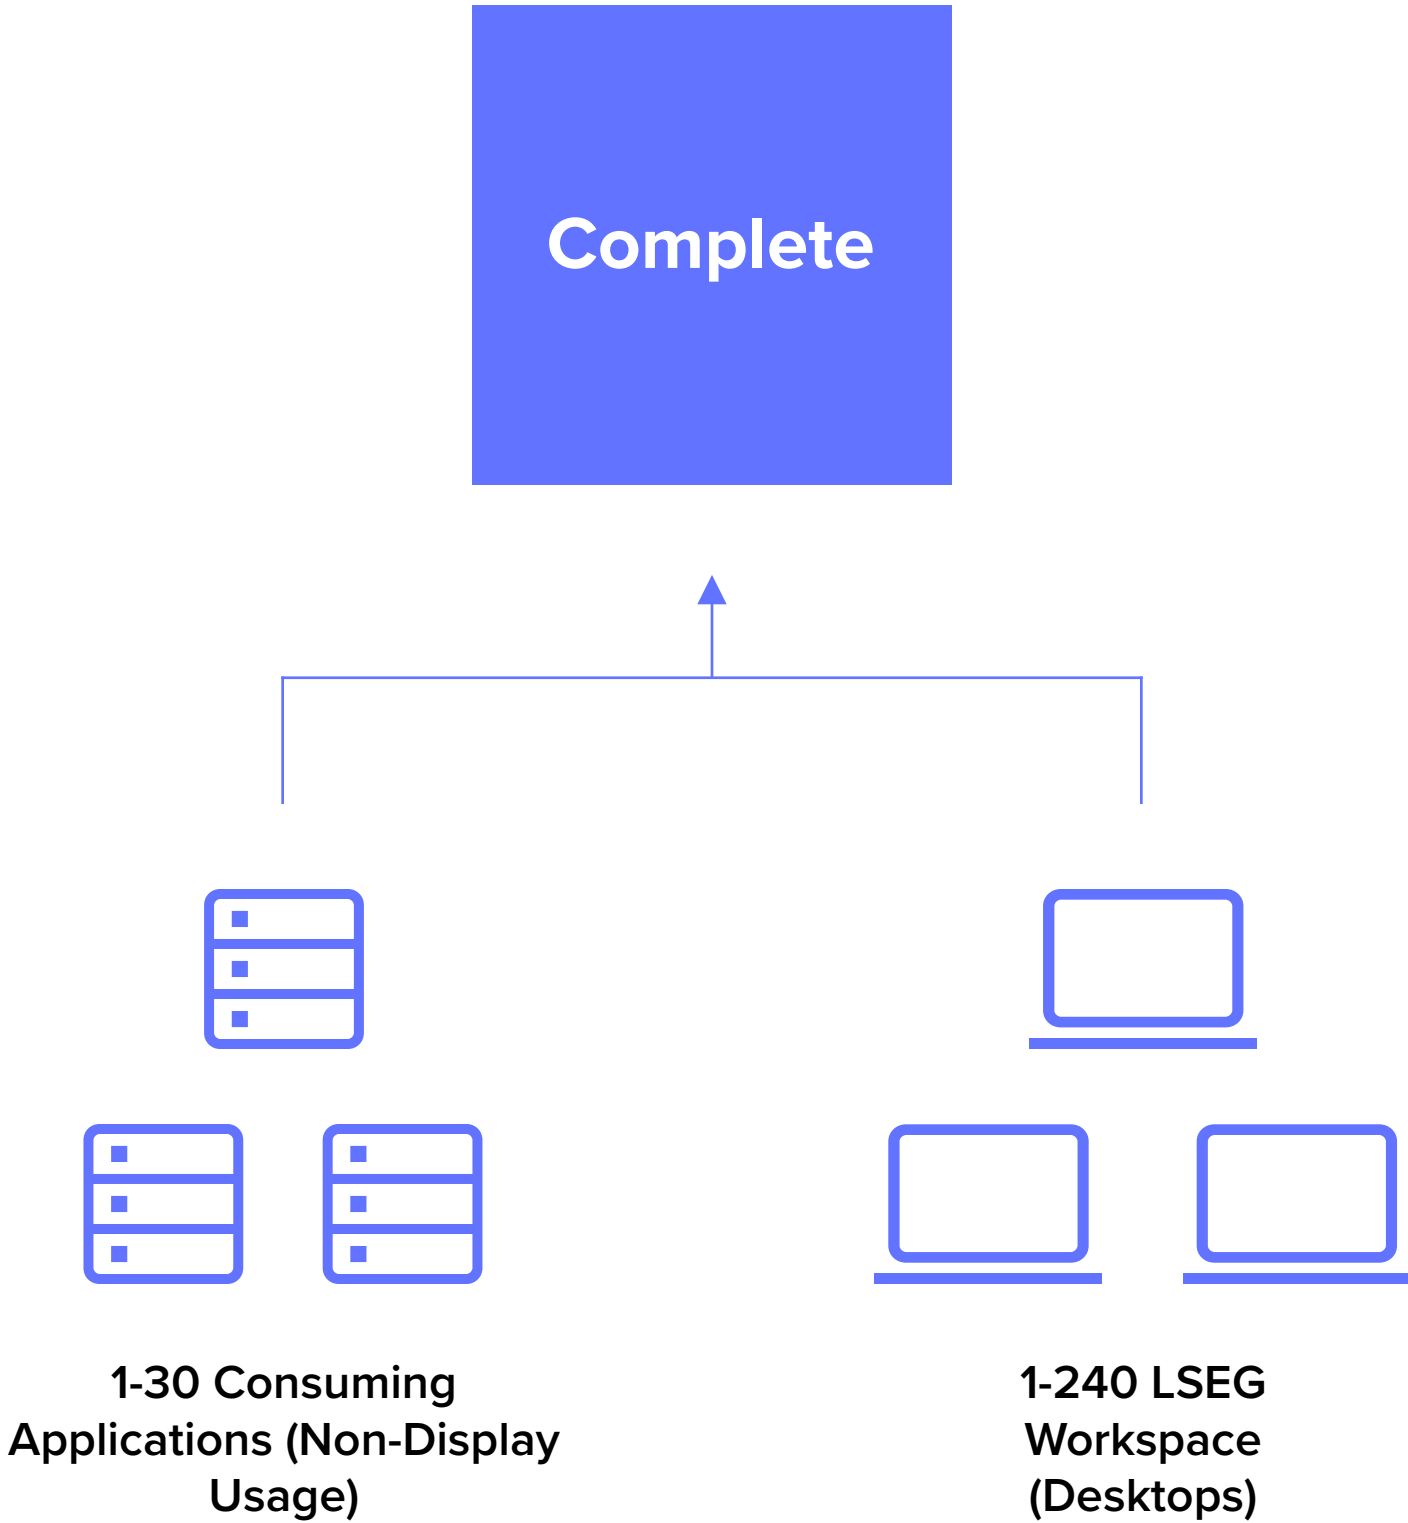

Real-Time Managed Distribution Service – Core

Number of Instruments	Up to 250k instruments to desktop & applications
Types of market data feeds	Pre-defined conflated feed - 3 updates per second
Configuration options	<ul style="list-style-type: none">• Pre-defined configuration• Configurable service name only
API support	EMA, ETA, Websockets, RFA 8 - requires encryption
Connectivity options	Bring your own Connectivity (AWS PrivateLink)
Deployment model	Public Cloud
Disaster recovery	On-demand DR (optional)
Contributions	No contributions
Data transformation	No data transformation
Resiliency	Resiliency within PoP as standard
Service monitoring and alerting	Measurable service with health reporting
Service management	Standard Service Management oversight
Deployment automation	Highly automated deployments
Time to market	1-2 weeks
Integration resources required	Self-Service / No SMEs needed

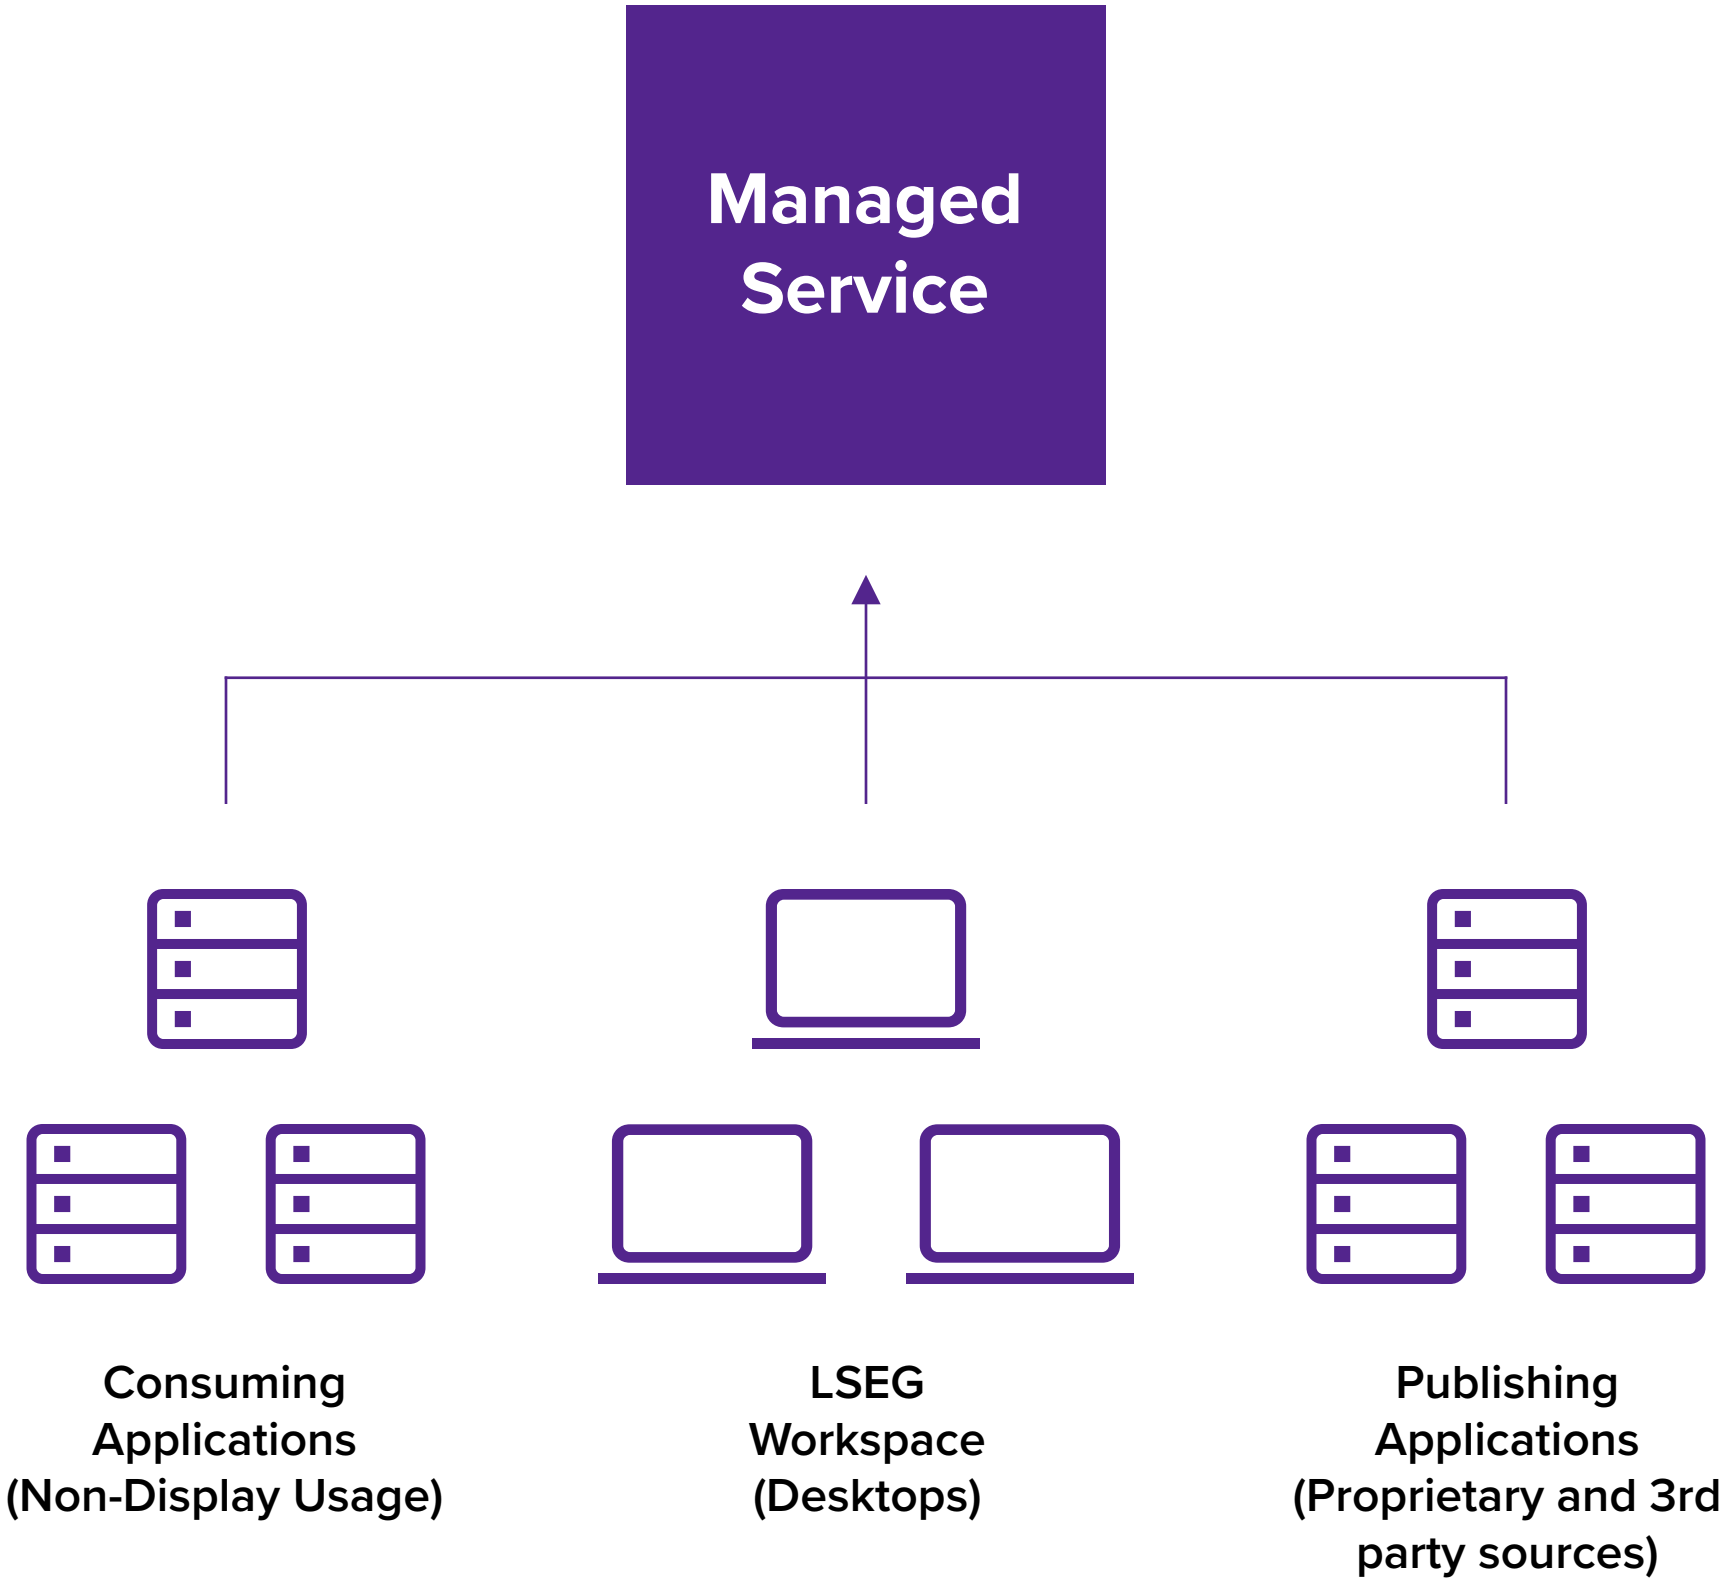

Real-Time Managed Distribution Service – Complete

Number of Instruments	Up to 500k instruments to desktop & applications
Types of market data feeds	Pre-defined conflated feed - 3 updates per second
Configuration options	More configuration options (e.g., 3rd party entitlements integration)
API support	EMA, ETA, Websockets, RFA 8 - requires encryption
Connectivity options	Bring your own Connectivity (AWS PrivateLink)
Deployment model	<ul style="list-style-type: none">• Private Cloud• Public Cloud
Disaster recovery	On-demand DR (optional)
Contributions	Contributions to LSEG (optional)
Data transformation	LSEG data transformation (optional)
Resiliency	<ul style="list-style-type: none">• Resiliency within PoP as standard• Elevated resiliency - quad endpoints
Service monitoring and alerting	Measurable service with health reporting
Service management	Customised service choices (e.g., start-of-day reports)
Deployment automation	Predominantly automated deployments
Time to market	3-4 weeks
Integration resources required	Some specialist resources required
