

# LSEG Workspace | Office

## Add-in System Requirements

Access to LSEG® data and tools is provided through either of the following separately installed add-ins. These tools provide an additional menu ribbon in certain Microsoft® Office apps, where:

- Workspace

This add-in is the core product, which has a comprehensive set of capabilities. This add-in is the recommended add-in for most users.

- Workspace Lite

This add-in provides basic capabilities and is typically recommended for macOS and web browser-based environments due to its functional limitations.

## Workspace

The **Workspace** add-in is installed as part of the LSEG Workspace desktop package and runs on Microsoft Excel® and Microsoft PowerPoint®. The ribbon for this add-in contains the full list of Web-based and COM options.

## Workspace Lite

The **Workspace Lite** add-in is an app found on the Microsoft AppSource®. This ribbon contains Web-based capabilities only.

This Web-based app runs in online versions of Excel and PowerPoint, using the latest supported version(s) of the browsers listed below:

- Microsoft Edge
- Google Chrome™
- Apple® Safari®
