# **Country Classification**

## SEPTEMBER 2006 UPDATE

### 1. Classification of Countries in 2007

On September 12 2006 FTSE Group ("FTSE") announced the results of its annual country classification review, the process by which stock markets are classified as either Developed or Emerging markets within the FTSE Global Equity Index Series.

The FTSE Equity Indices Committee has confirmed that there will be no changes to the designations of any country in the FTSE Global Equities Series during 2007.

This decision was made after the completion of FTSE's engagement programme with stock exchanges globally including a close examination of market structures and conditions. The criteria used to assess country classification are based on feedback obtained from an extensive market consultation programme.

#### 2. FTSE Watch List Confirmation

In order to ensure that the potential movement of countries is transparent to investors we have created a Watch List of countries that may be subject to a change in their classification if a number of conditions are met. Addition to the FTSE Watch List is the first step in a change of designation status.

At the 2006 review, the FTSE Equities Index Committee added the following five countries to the Watch List.

- Israel possible move to Developed status
- Greece, Hungary and Poland possible moves to Advanced Emerging status
- Pakistan possible removal from FTSE Global Equity Index Series.

South Korea, Taiwan and China "A" Shares remain on the Watch List.

Watch List countries will be assessed again at the next country classification review in September 2007. Watch List countries will remain on the Watch List for a minimum of twelve months before any change is made to their status. FTSE will give investors a minimum of six-months notice prior to any changes being implemented in its indices as a result of a country classification review. No changes to the classification of any countries are therefore expected to be implemented before March 2008 at the earliest.

The Watch List countries are now:
