Section 2

Management responsibilities

2. Management responsibilities

2.1 FTSE International Limited (FTSE)

2.1.1 FTSE is the benchmark administrator of the index series¹.

2.1.2 FTSE is responsible for the daily calculation, production and operation of the FTSE Custom ESG Screened Index Series, and will:

- maintain records of the index weightings of all constituents;
- make changes to the constituents and their weightings in accordance with the Ground Rules;
- carry out the periodic index reviews of the index and apply the changes resulting from the reviews as required by the Ground Rules;
- publish changes to the constituent weightings resulting from their ongoing maintenance and the periodic reviews; and
- disseminate the indices.

2.2 Amendments to these Ground Rules

2.2.1 These Ground Rules shall be subject to regular review (at least once a year) by FTSE Russell to ensure that they continue to best reflect the aims of the index series. Any proposals for significant amendments to these Ground Rules will be subject to consultation with FTSE Russell advisory committees and other stakeholders if appropriate. The feedback from these consultations will be considered by the FTSE Russell Index Governance Board before approval is granted.

2.2.2 As provided for in the Statement of Principles for FTSE Russell Equity Indices, where FTSE Russell determines that the Ground Rules are silent or do not specifically and unambiguously apply to the subject matter of any decision, any decision shall be based as far as practical on the Statement of Principles. After making any such determination, FTSE Russell shall advise the market of its decision at the earliest opportunity. Any such treatment will not be considered as an exception or change to the Ground Rules, or to set a precedent for future action, but FTSE Russell will consider whether the Ground Rules should subsequently be updated to provide greater clarity.

¹ The term administrator is used in this document in the same sense as it is defined in [Regulation \(EU\) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds](#) (the European Benchmark Regulation) and [The Benchmarks \(Amendment and Transitional Provision\) \(EU Exit\) Regulations 2019](#) (the UK Benchmark Regulation).

- 6.1.2 The exclusion list will be used to add or remove companies from the FTSE Custom ESG Screened Index on a quarterly basis.
- 6.1.3 Index reviews will be implemented after the close of business on the third Friday of the review month.

6.2 Weighting

- 6.2.1 The FTSE Custom ESG Screened Index Series is weighted by free float adjusted market capitalisation. The free float adjustments are in line with the corresponding underlying index.

Section 7

Changes to constituent companies

7. Changes to constituent companies

7.1 Intra-review additions

- 7.1.1 Where applicable, fast entrants to the underlying index will be eligible for inclusion in the index series at the next quarterly index review.

7.2 Intra-review deletions

- 7.2.1 If a constituent is removed from the underlying index (see rule 4.1.1), it will be removed from the respective FTSE Custom ESG Screened Index. The removal will be concurrent with its removal from its underlying index.

7.3 Intra-review exclusion changes

- 7.3.1 If the exclusion status of an existing constituent of the underlying index changes, membership of FTSE Custom ESG Screened Index will be considered at the next index review.

Section 8

Corporate actions and events

8. Corporate actions and events

- 8.1 Full details of changes to constituent companies due to corporate actions and events can be accessed in the Corporate Actions and Events Guide using the following link:

[Corporate Actions and Events Guide.pdf](#)

A corporate action is an action on shareholders with a prescribed ex-date. The share price will be subject to an adjustment on the ex-date. These include the following:

- capital repayments;
- rights issues/entitlement offers;
- stock conversion;
- splits (sub-division)/reverse splits (consolidation); and
- scrip issues (capitalisation or bonus issue).

A corporate event is a reaction to company news (event) that may impact the index depending on the index rules. For example, a company announces a strategic shareholder is offering to sell their shares (secondary share offer) – this could result in a free float weighting change in the index. Where an index adjustment is required, FTSE Russell will provide notice advising of the timing of the change.

8.2 Shares in issue

Changes to the number of shares in issue for constituent securities are covered in the Corporate Actions and Events Guide.

8.3 Investability weightings

- 8.3.1 Changes to free float for constituent securities are covered in the Corporate Actions and Events Guide.

8.4 Suspended companies

- 8.4.1 FTSE Russell's treatment can be found using the following link:

[Suspended Companies Rule.pdf](#)

8.5 Takeovers, mergers and demergers

The treatment of takeovers, mergers and demergers can be found within the Corporate Actions and Events Guide for Market Capitalisation Weighted Indices.

8.6 Mergers, restructuring and complex takeovers

- 8.6.1 If the effect of a merger or takeover is that one constituent in the FTSE Custom ESG Screened Index is absorbed by another constituent, the resulting company will remain a constituent of the index.
- 8.6.2 If a constituent company in the FTSE Custom ESG Screened Index is taken over by a non-constituent company, the original constituent will be removed.
- 8.6.3 If a constituent company is split to form two or more companies, then the resulting companies will be eligible for inclusion in the FTSE Custom ESG Screened Index.

Section 9

Index calculation

9. Index calculation

9.1 Prices

9.1.1 The FTSE Custom ESG Screened Index Series uses actual closing mid-market or last trade prices, where available, for securities with local market quotations. Further details can be accessed using the following link:

[Closing Prices Used For Index Calculation.pdf](#)

9.1.2 Reuters real-time share prices are used during the intra-day calculation period.

9.2 Foreign exchange rates

9.2.1 WMR FX Benchmarks real-time exchange rates are used in the index calculations, which are disseminated in real time.

9.2.2 Exchange rates used in the end-of-day calculations are WMR Closing Spot Rates™, collected at 16:00 UK time.

9.3 Index calculation

9.3.1 The index levels will be displayed to eight decimal points.

9.3.2 The index is calculated using the following formula:

$$\sum_{i=1}^N \frac{(p_i \times e_i \times s_i \times f_i \times c_i)}{d}$$

where:

- $i=1,2,\dots,N$
- N is the number of securities in the index.
- p_i is the latest trade price of the component security (or the price at the close of the index on the previous day).
- e_i is the exchange rate required to convert the security's currency into the index's base currency.
- s_i is the number of shares in issue used by FTSE Russell for the security, as defined in these Ground Rules.
- f_i is the investability weighting factor to be applied to a security to allow amendments to its weighting, expressed as a number between 0 and 1, where 1 represents a 100% free float. This factor is published by FTSE Russell for each security in the underlying index.
- c_i is the capping factor to be applied to a security to correctly weight that security in the index.
- d is the divisor, a figure that represents the total issued share capital of the index at the base date. The divisor can be adjusted to allow changes in the issued share capital of individual securities to be made without distorting the index.
