Section 1

Introduction

1. Introduction

1.1 FTSE Goldman Sachs UK Gilts 1-10 Years Index

1.1.1 The FTSE Goldman Sachs UK Gilts 1-10 Years Index (“Index”) measures the performance of fixed-rate, UK government bonds. The Index is created from a starting universe of the FTSE UK Government Bond Index (“Base Index”), screened for maturity, and utilizes an optimization process to select securities and determine weights such that projected return for a given level of risk is maximized. The Index aims to maximize one-month projected return by ensuring the return volatility of the Index remains below a preset level, the term structure is constrained within a band relative to the Base Index, and the duration matches the Base Index.

1.1.2 The FTSE Goldman Sachs UK Gilts 1-10 Years Index does not take account of ESG factors in its design.

1.2 FTSE Russell

1.2.1 FTSE Russell is a trading name of FTSE International Limited, Frank Russell Company, FTSE Global Debt Capital Markets Limited (and its subsidiary FTSE Global Debt Capital Markets Inc.,) FTSE Fixed Income LLC, FTSE (Beijing) Consulting Limited.

1.2.2 FTSE Russell hereby notifies users of the index that it is possible that factors, including external factors beyond the control of FTSE Russell, may necessitate changes to, or the cessation, of the index and therefore, any financial contracts or other financial instruments that reference the index or investment funds which use the index to measure their performance should be able to withstand, or otherwise address the possibility of changes to, or cessation of, the index.

1.2.3 Index users who choose to follow this index or to buy products that claim to follow this index should assess the merits of the index’s rules-based methodology and take independent investment advice before investing their own or client funds. No liability whether as a result of negligence or otherwise is accepted by FTSE Russell or any members of the FTSE Russell Policy Advisory Board (or any person concerned with the preparation or publication of these Ground Rules) for any losses, damages, claims and expenses suffered by any person as a result of:

- any reliance on these Ground Rules, and/or
- any inaccuracies in these Ground Rules, and/or
- any non-application or misapplication of the policies or procedures described in these Ground Rules, and/or
- any inaccuracies in the compilation of the Index or any constituent data.

Section 2

Management responsibilities

2. Management responsibilities

2.1 FTSE International Limited (FTSE)

2.1.1 FTSE is the benchmark administrator of the index.¹

2.1.2 FTSE is responsible for the daily calculation, production and operation of the index series and will:

- maintain records of all the constituents;
- be responsible for the addition and deletion of bonds and changes of nominal amounts, in accordance with the Ground Rules.
- disseminate the indices.

2.2 Amendments to these Ground Rules

2.2.1 These Ground Rules shall be subject to regular review (at least once a year) by FTSE Russell to ensure that they best reflect the aim of the index series. Any proposals for significant amendments to these Ground Rules will be subject to consultation with FTSE Russell advisory committees and other stakeholders if appropriate. The feedback from these consultations will be considered by the FTSE Russell Index Governance Board before approval is granted.

2.2.2 As provided for in the Statement of Principles for FTSE Russell Fixed Income Indices, where FTSE Russell determines that the Ground Rules are silent or do not specifically and unambiguously apply to the subject matter of any decision, any decision shall be based as far as practical on the Statement of Principles. After making any such determination, FTSE Russell shall advise the market of its decision at the earliest opportunity. Any such treatment will not be considered as an exception or change to the Ground Rules, or to set a precedent for future action, but FTSE Russell will consider whether the Ground Rules should subsequently be updated to provide greater clarity.

¹ The term administrator is used in this document in the same sense as it is defined in [Regulation \(EU\) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds](#) (the European Benchmark Regulation) and [The Benchmarks \(Amendment and Transitional Provision\) \(EU Exit\) Regulations 2019](#) (the UK Benchmark Regulation).

Section 3

FTSE Russell index policies

3. FTSE Russell index policies

These Ground Rules should be read in conjunction with the following policy documents which can be accessed using the links below or by contacting fi.index@lseg.com. These policies are reviewed annually and any changes are approved by the FTSE Russell Index Governance Board.

3.1 Statement of Principles for FTSE Fixed Income Indices (the Statement of Principles)

Indices need to keep abreast of changing markets and the Ground Rules cannot anticipate every eventuality. Where the Ground Rules do not fully cover a specific event or development, FTSE Russell will determine the appropriate treatment by reference to the Statement of Principles for FTSE Fixed Income Indices which summarises the ethos underlying FTSE Russell's approach to index construction. The Statement of Principles is reviewed annually and any changes proposed by FTSE Russell are presented to the FTSE Russell Policy Advisory Board for discussion before approval by the FTSE Russell Index Governance Board.

The Statement of Principles for Fixed Income Indices can be accessed using the following link:

[Statement of Principles Fixed Income Indices.pdf](#)

3.2 Queries and Complaints

FTSE Russell's complaints procedure can be accessed using the following link:

[Benchmark Determination Complaints Handling Policy.pdf](#)

3.3 Recalculation Policy and Guidelines

The Recalculation Policy and Guidelines for Fixed Income Indices document is available from the FTSE Russell website using the link below or by contacting fi.index@lseg.com.

[Fixed Income Recalculation Policy and Guidelines.pdf](#)

3.4 Policy for Benchmark Methodology Changes

Details of FTSE Russell's policy for making benchmark methodology changes can be accessed using the following link:

[Policy for Benchmark Methodology Changes.pdf](#)

3.5 FTSE Russell Governance Framework

3.5.1 To oversee its indices, FTSE Russell employs a governance framework that encompasses product, service and technology governance. The framework incorporates the London Stock Exchange Group's three lines of defence risk management framework and is designed to meet the requirements of the IOSCO Principles for Financial Benchmarks², the European benchmark regulation³ and the UK benchmark regulation⁴. The FTSE Russell Governance Framework can be accessed using the following link:

[FTSE Russell Governance Framework.pdf](#)

² IOSCO Principles for Financial Benchmarks Final Report, FR07/13 July 2013.

³ Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds.

⁴ The Benchmarks (Amendment and Transitional Provision) (EU Exit) Regulations 2019.

Section 4

Composition and design criteria

4. Composition and design criteria

4.1 The FTSE Goldman Sachs UK Gilts 1-10 Years Index selects securities from the constituents of the FTSE UK Government Bond Index and assigns weights based on an optimization process.

Figure 1. Design criteria and calculation assumptions for the FTSE Goldman Sachs UK Gilts 1-10 Years Index

Coupon	Fixed rate
Currency	GBP
Minimum maturity	At least one year
Maximum maturity	Ten years
Minimum issue size	GBP 2 billion public amount outstanding (excludes Bank of England holdings)
Composition	<p>Securities included: Fixed-rate UK Gilts</p> <p>Securities excluded: Variable rate, floating-rate, index-linked, retail directed, bills, stripped zero coupon, convertibles, savings, and private placements</p>
Weighting	Alternatively weighted according to Reconstitution/Optimization
Reconstitution/Optimization	<p>Each month eligible bonds are divided into maturity sectors based on their weighted average life (WAL) in years as of the rebalancing month end ("Maturity Sectors") as follows: one to three, three to five, five to seven, and seven to ten.</p> <p>An optimization is performed quarterly, at the end of February, May, August, and November, with the objective of maximizing projected three-month returns⁵. Projected returns for each security are computed by setting the settlement date forward by three months and assuming a constant yield curve and OAS.</p> <p>The optimization constraints include:</p> <ol style="list-style-type: none"> 1. Each Maturity Sector's market value can vary from 50% to 150% relative to the corresponding Maturity Sector of the Base Index⁶. 2. Allocations to the bonds within a Maturity Sector are weighted in proportion to each security's market capitalization. 3. Index return variance (weekly over the prior year) is not to exceed 125% of that of the Base Index in GBP. 4. The modified duration and total market value of the Index are set to the Base Index. <p>Optimization utilizes pricing and amounts outstanding of the Base Index in order to reconstruct index holdings and weights.</p> <p>For non-quarterly optimization months, the reconstitution steps are as follow:</p> <ol style="list-style-type: none"> 1. Bonds in the Base Index that no longer meet the size or maturity requirements are removed from the Index. For bonds previously in the index, initial par amounts are rolled over from the prior month to reflect their latest weights, initially determined in the quarterly optimization. 2. New bond entrants join the index at scaled par amounts. The scaling factor is calculated using the prior month's corresponding Maturity Sector weight relative to that of the Base Index.

⁵ Prior to 30 November 2025, optimization is performed monthly.

⁶ Prior to 30 November 2025, each Maturity Sector's market value could vary from 0% to 200% relative to the corresponding Maturity Sector of the Base Index.

	3. Bonds are grouped into two maturity buckets, one to five (combining the one to three and three to five Maturity Sectors) and five to ten (combining the five to seven and seven to ten Maturity sectors), after which weights of each maturity bucket are adjusted to match the modified duration of the Base Index.
Rebalancing	Once a month on the last business day of the month (pricing as of the last business day of the monthly and settlement as of the last calendar day of the month.)
Reinvestment of cash flows	Intra-month cash flows from interest and principal payments are not reinvested as part of monthly index total return calculations. ⁷
Pricing	LSEG Pricing Service mid-market 4:15 p.m. (London)
Calculation frequency	Daily
Settlement date	Monthly: Last calendar day Daily: Same day settlement except if the last business day of the month is not the last calendar day of the month; then, settlement is on the last calendar day of the month
Fixing date	Each month, the upcoming month's index constituents are "fixed" on the profile fixing date. Each year's scheduled fixing dates are published on the website.
Base date	February 29, 2016

4.2 Holiday calendar

4.2.1 The index is calculated Monday through Friday except Christmas Day (observed) and New Year's Day (observed). Each local market will observe its own holiday calendar; if a local market is on holiday, the closing prices used for that day will be the closing prices from the previous day.

4.3 Index quality

4.3.1 An index quality is assigned to each index bond as of profile fixing. The quality is first mapped to the Standard & Poor's Financial Services LLC ("S&P") rating. If a bond is not rated by S&P but it is rated by Moody's Investors Service, Inc ("Moody's"), the S&P equivalent of the Moody's rating is assigned to the index quality. If a bond is rated by neither S&P nor Moody's, the bond is not assigned an index quality. If a bond is rated as investment-grade by one rating agency and high-yield by the other, the S&P equivalent of the investment-grade rating is assigned to the index quality. These ratings remain unchanged for the entire performance month.

4.4 Return computation

4.4.1 Total returns are computed on the assumption that each security is purchased at the beginning of the period and sold at the end of the period. An issue's total rate of return is the percentage change in its total value over the measurement period (see Figure 2). The components of total return for each security are price change, principal payments, coupon payments and accrued interest. The total returns are market capitalization-weighted using the security's beginning-of-period market value.

Figure 2. Total rate of return calculation methodology

Beginning-of-period value	-	(Beginning price + Beginning accrued) x Beginning par amount outstanding
End-of-period value	-	[(Ending price + Ending accrued) x (Beginning par amount outstanding – Principal payments)] + Coupon payments + Principal payments
Total rate of return (%)	-	[(End-of-period value/Beginning-of-period value) – 1] x 100

A note on precision: Returns are computed to at least six decimal places but reported to a maximum of four. In addition, owing to rounding inaccuracies inherent in computer floating-point arithmetic, the last digit in any reported value may sometimes be off by one from its true value.

Ticker for the FTSE Goldman Sachs UK Gilts 1-10 Years Index

Ticker	Index
CFIIUKG1	FTSE Goldman Sachs UK Gilts 1-10 Years Index

⁷ Prior to 1 November 2022, reinvestment income was included in the total return calculation.

4.5 Chronological summary of events

Year	Monthly highlights
2025	November: optimization frequency changed to quarterly; Maturity Sector market value weight constraints changed to 50%-150%
