Section 4

Index construction

4. Index construction

4.1 Eligible securities

4.1.1 The universe of eligible constituents is all the Taiwan securities that are current constituents of the FTSE Global Equity Index Series and listed on the Main Board of the Taiwan Stock Exchange, subject to conforming to all other rules of eligibility, free float and liquidity. Stocks listed on the Taipei Exchange will not be eligible.

4.1.2 The shares, investability weightings and treatment of secondary lines of stock of constituents are the same as in the FTSE Global Equity Index Series.

4.1.3 Companies will be included in the FTSE TWSE Taiwan Shariah Index if they are:

- A. current large- and mid-cap constituents of the FTSE Global Equity Index Series
- B. they are also considered to be Shariah compliant as defined in rule 4.2

4.2 Shariah screening methodology by Yasaar

4.2.1 Yasaar will ensure that all constituents and potential constituents are screened quarterly to determine their Shariah status. An overview of the Yasaar/FTSE Russell stock screening criteria are listed below.

4.2.2 Companies involved in the following activities are non-permitted business sectors:

- A. conventional finance (non-Islamic banking, finance and insurance, etc);
- B. alcohol and intoxicants: All forms of Alcohol or Alcohol based products and other intoxicants including, but not limited to, those participating in the alcohol/intoxicants trade businesses and offerings including the entire process chain; such as distillers, conveyers, packagers, distributors, vendors, storers, bars and restaurants;
- C. pork-related products and non-halal food production, packaging and processing or any other activity related to pork and non-halal food;
- D. entertainment (casinos, gambling, cinema, music, pornography and hotels);
- E. tobacco in all its forms, processors, vendors and manufacturers including but not limited to raw or treated tobacco, electronic cigarettes and vapes, cigarettes, cigars, Shisha and other water pipes using tobacco.
- F. weapons, arms and defence manufacturing.

This list is not exhaustive and is provided as a basic guidance to the broad principles involved.

4.2.3 After companies have been screened by their business sector activity, the remaining companies are further examined on their finances to ensure that those companies are Shariah compliant. Only those companies that pass the following financial ratios will be considered Shariah compliant:

- A. debt is less than 33.333% of total assets;
- B. cash and interest-bearing items are less than 33.333% of total assets;
- C. accounts receivable and cash are less than 50% of total assets; and
- D. total interest and non compliant activities income should not exceed 5% of total revenue.

Companies that change financial compliance between two successive quarters will be monitored to check if their debt and/or cash/interest bearing ratios fall within 33.333% +/- 5% (i.e. below 31.667% and 35% or above). If, during the monitoring period, any company remains above or below 33.333% +/- 5% for two consecutive quarters, the compliance of that company will change accordingly.

Appropriate purification of dividends is at 5%. This ratio calculates the recommended purification amount to be paid by the investor.

Where:

- $i=1,2,\dots,N$;
- N is the number of securities in the index;
- p_i is the latest trade price of the component security (or the price at the close of the index on the previous day);
- e_i is the exchange rate required to convert the security's currency into the index's base currency;
- s_i is the number of shares in issue used by FTSE Russell for the security, as defined in these Ground Rules;
- f_i is the investability weighting factor to be applied to a security to allow amendments to its weighting, expressed as a number between 0 and 1, where 1 represents a 100% free float. This factor is published by FTSE Russell for each security in the underlying index; and
