## 1. Introduction

### 1.1 Industry Classification Benchmark

1.1.1 The Industry Classification Benchmark (ICB) is a detailed and comprehensive structure for sector and industry analysis, facilitating the comparison of companies across four levels of classification and national boundaries. The classification system allocates companies to the subsector whose definition closely describes the nature of its business as determined from the source of its revenue or the source of the majority of its revenue where available, as detailed in Rule 4.2.1.

The structure and definitions of all subsectors of ICB are available in Section 6.

### 1.2 FTSE Russell

FTSE Russell is a trading name of FTSE International Limited, Frank Russell Company, FTSE Global Debt Capital Markets Limited (and its subsidiaries FTSE Global Debt Capital Markets Inc. and FTSE Fixed Income Europe Limited), FTSE Fixed Income LLC, FTSE (Beijing) Consulting Limited, Refinitiv Benchmark Services (UK) Limited, Refinitiv Limited and Beyond Ratings.

## 2. Management responsibilities

### 2.1 FTSE Russell

- 2.1.1 FTSE Russell is responsible for maintaining ICB, and for the classification of all companies within ICB.
- 2.1.2 FTSE Russell will maintain a record of all changes in the classification of companies and is responsible for ensuring the timely publication of all company classification changes.
- 2.1.3 FTSE Russell will monitor corporate events, which occur between quarterly meetings, that may affect the industrial classification of a company.

### 2.2 FTSE Russell Industry Classification Advisory Committee

- 2.2.1 The FTSE Russell Industry Classification Advisory Committee has been established by FTSE Russell. The Committee may recommend changes to the ICB Ground Rules and the ICB structure, for approval by the FTSE Russell Governance Board.
- 2.2.2 The Terms of Reference of the FTSE Russell Industry Classification Advisory Committee are set out on the FTSE Russell website and can be accessed using the following link:

[FTSE Russell Industry Classification Advisory Committee.pdf](#)

### 2.3 FTSE Russell Policy Advisory Board

- 2.3.1 The FTSE Russell Policy Advisory Board, whose membership is representative of users of FTSE Russell Indices, has been established by FTSE Russell as an independent committee. The FTSE Russell Policy Advisory Board provides strategic advice to FTSE Russell on the construction and maintenance of agreed indices (as stipulated in their terms of reference) and to oversee the practitioner committees established by FTSE Russell to assist in the management of the indices. The FTSE Russell Policy Advisory Board terms of reference also include the provision of strategic advice on the construction and maintenance of ICB.
- 2.3.2 The terms of reference of the FTSE Russell Policy Advisory Board are set out on the FTSE Russell website and can be accessed using the following link:

## Section 4

# Classification guidelines

## 4. Classification guidelines

### 4.1 Basis of decisions

4.1.1 FTSE Russell will at all times approach decisions affecting the industry classification of companies with reference to these guidelines.

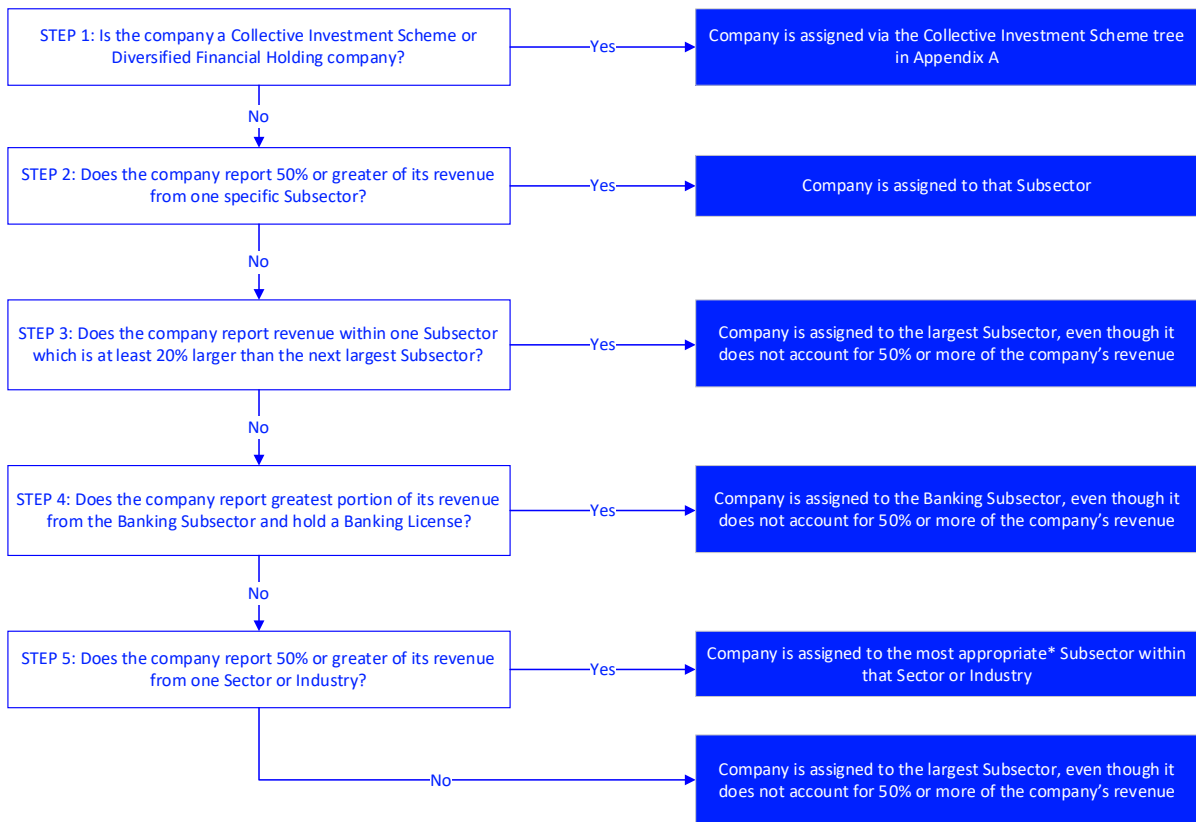

### 4.2 Allocation of companies to subsectors

4.2.1 A company will be allocated to that subsector of ICB whose definition most closely coincides with the source of the company's revenue or the source of the majority of its revenue. The principal source of information used for the classification of a company shall be its audited accounts and directors' report. Where a company carries out two or more lines of business that differ substantially from each other, FTSE Russell will base its decision on the accounting segmentation published in the audited accounts and directors' report. Interim statements will not normally be used. Changes in a company's business or structure will be considered under Rule 4.3.1.

Where revenue information is unavailable or insufficient, or where a company is new or is in the course of changing its line of business, the company will be allocated to that subsector whose definition most closely coincides with the description of the company's business as stated in the company's annual report, or if the annual report is not available, the description of the company's business provided in the company's listing prospectus or in the company's regulatory filings or, if none of these is available, the business description provided on the company's website.

4.2.2 Segmental reporting normally discloses revenue before tax, minority interests, extraordinary items and interest earned or incurred. Unless there is audited evidence that any of these items is specifically attributable to a class of business for which revenue is disclosed, it will be disregarded in assessing the sources of revenue. Where any part of the company's business is to earn interest or incur interest, or interest expenses are central to the business, then such interest shall be taken into account in determining the company's business.

4.2.3 Subject to Rules 4.2.1 and 4.2.2 companies will be assigned a classification using the following method

\* If the company reports at least 20% more revenue in one Subsector within the relevant Industry or Sector, it will be assigned to that Subsector. Otherwise:

To be assigned a Diversified Sector classification (Diversified Materials, General Mining, Diversified Retailers, Diversified Chemicals or Diversified REITs) a company will report 50% or more of its revenue within the Sector, but less than 50% within one specific Subsector.

To be assigned a Diversified Industry classification (Diversified Financial Services, Diversified Industrials or Multi-Utilities) a company will report 50% or more of its revenue within the Industry, but less than 50% within one specific Subsector.

Companies which generate 50% or more of their revenue from one Industry, but are not classified per the above, will be assigned to the Subsector within that Industry which provides the largest portion of the company's revenue.

**To illustrate Step 3 – where a company does NOT generate 50% or greater of revenue from one Subsector, however largest Subsector is 20% or greater than the next largest Subsector**

- Company A generates 40% of its revenue from Construction (50101010), 15% from Cement (50101030), 13% from Electrical Components (50202010), 12% from Specialty Chemicals (55201020), 10% from Pipelines (60101035) and 10% from Multi-utilities (65102000). As the company generates over 20% more of its revenue from one Subsector to the next highest, the company is assigned to that Subsector – Construction.

**To illustrate Step 4 - where company holds a banking license and greatest portion of revenue is generated from the Banks Subsector – 20% or greater threshold does not apply**

- Company B generates 40% of its revenue from Banks (30101010), 30% from Asset Managers and Custodians (30202010) and 30% from Investment Services (30202015). The company holds a Banking License. As the company holds a banking license and the Banks Subsector generates the greatest portion of revenue, the company is assigned to the Banks Subsector.

Note: If the company did not hold a Banking License it would instead have been assigned a Diversified Financial Services classification as no one Subsector is 20% or greater than the next highest.

**To illustrate Step 5 - where 50% or greater of revenue is generated from one Industry**

- Company B generates 30% of its revenue from Computer Services (10101010), 25% from Software (10101015) and 45% from Telecommunications Equipment (15101010). As the company derives 55% of its revenue from the Technology Industry, and there are no diversified Sector or Industry classifications within Technology, the company is assigned to the Subsector within the Technology Industry which provides the greatest portion of its revenue - Computer Services.
- Company C generates 10% of revenue from Banks (30101010), 40% from Asset Managers and Custodians (30202010), 10% from Investment Services (30202015) and 40% from Real Estate Holding and Development (35101010). As the company derives 60% of its revenue from the Financials Industry, the company will be assigned there. As Asset Management revenue is greater than 20% larger than the next largest Subsector within the Financials Industry, the company is assigned to Asset Managers and Custodians.

Note: If Asset Management was not 20% larger than the next Subsector, the company would instead have been assigned a Diversified Financial Services classification.

**To illustrate Step 5 - where there is no one dominant Industry or Sector which generates greatest portion of revenue**

- Company D generates 35% of revenue from Consumer Electronics (40203010), 20% from Personal Products (45201020), 13% from Electrical Components (50202010), 12% from Specialty Chemicals (55201020), 10% from Pipelines (60101035) and 10% from Multi-utilities (65102000). No one Subsector generates 20% or more of revenue than the next highest and no one Sector or Industry provides 50% or greater of the company's revenue. The company is therefore assigned to the Subsector which provides the greatest portion of revenue – Consumer Electronics.

4.2.4 Companies which are classified as ICB subsectors closed end investments and open end and miscellaneous investment vehicles are classified based on their structure and not the source of the company's revenue. Additionally, investment holding companies will be assigned an ICB classification based on their investment objective. Where the investment holding company is deemed to hold controlling interests in companies, the ICB will either be assigned to diversified financial services or where there is a single investment theme (e.g. infrastructure, property, biotechnology), to the subsector which it represents. Where the investment holding company is deemed to hold non-controlling interests, the company will be treated akin to an investment trust and assigned an ICB of closed end investments.

Please refer to Appendix A for further details.

4.2.5 FTSE Russell will seek to maintain stability in the classification of companies by disregarding what it considers to be temporary fluctuations in the fortunes of individual businesses.

4.2.6 In exceptional circumstances, the classification may reflect other factors, if the FTSE Russell Industry Classification Advisory Committee considers that ignoring these factors may result in a misleading classification.

For example, FTSE Russell may, in consultation with the FTSE Russell Industry Classification Advisory Committee, classify companies on the basis of either the immediate end use of their product or the industrial process used.

4.2.7 The ICB classification allocated to a company will also apply to the fixed income securities issued by that company.

**4.3 Changes to the classification of a company**

4.3.1 Where a significant change takes place in a company's structure as a result of a corporate event (such as a merger or demerger), its ICB classification will be reassessed on the basis of financial data formally published by the company. The ICB classification will be allocated in line with Rule 4.2.1.

- 4.3.2 Any adjustment resulting from a change in a company's classification under Rule 4.3.1 will be implemented either concurrent with, or shortly after (e.g. T+2), the implementation of the associated corporate event.
- 4.3.3 A company's classification may also be reviewed by FTSE Russell either at its discretion or at the request of the company or professional advisors acting on the company's behalf.

Any adjustment resulting from a change in a company's classification will be effective on the Monday after the third Friday of March, June, September and December. The cut-off date for the receipt of data or other justification relating to any such change is the last business day of January, April, July and October.

Please note: in circumstances where an incorrect ICB classification has been assigned to a company at IPO, FTSE Russell reserves the right to update the ICB classification with a minimum T+2 notice.

#### **4.4 Industry sectors**

- 4.4.1 FTSE Russell will seek to avoid the maintenance of sectors or subsectors containing a single company.

#### **4.5 Changes to the ICB**

Changes to the structure of ICB will be evolutionary. Any changes to the ICB structure (subsectors, sectors, supersectors or industries) shall take place with a minimum of six months' notice. These changes will be considered by the FTSE Russell Industry Classification Advisory Committee and will be based on long-term trends, rather than what it considers may be temporary fluctuations within individual industries.

## Section 5

# Periodic reviews

## 5. Periodic reviews

### 5.1 Periodic reviews

5.1.1 The classification of all companies in the ICB global universe will be reviewed following receipt of their annual report.

The cut-off dates for the receipt of data for consideration at periodic reviews and the corresponding implementation dates are shown below:

Cut-off date	ICB effective date
Last business day of January	Monday after the third Friday of March
Last business day of April	Monday after the third Friday of June
Last business day of July	Monday after the third Friday of September
Last business day of October	Monday after the third Friday of December

5.1.2 **Review procedures:** the industry classification of each company will be determined by analysing the financial reports based on the rules under Section 4 of these classification guidelines.

5.1.3 **Implementation:** periodic changes to the industry classification of a company will be implemented after the close on the third Friday of March, June, September and December.

5.1.4 **Monthly announcements:** on the first business day of each month an indicative list of pending periodic review changes (to be implemented as per Rule 5.1.2) will be announced.

5.1.5 **Quarterly periodic review announcement:** the confirmed periodic review changes will be announced on the Wednesday following the second Friday of February, May, August and November. Any revisions to those announcements may be made up until the Friday two weeks prior to the ICB effective implementation date. Revisions after this date will only be considered under exceptional circumstances.

## Appendix A

# Collective investment schemes

## Controlling stakes

A holding greater than 50% is defined as ‘controlling’. When assessing a portfolio of investments, the number of investments in which the company holds >50% must equate to 50% or more of the entire portfolio (i.e. half or more of the portfolio is made up of controlling stakes). As part of the assessment, the investment objective of the company may also be referenced. If the objective is to exert influence, have board representation or be involved in management responsibilities of minority holdings then those holdings will be categorised as controlling interests.
