## Section 1

# Introduction

---

## 1. Introduction

### 1.1 Russell Equal Weight Index Series

- 1.1.1 Russell research has shown that the process of equally weighting each industry within an underlying index, then equally weighting each of the constituents within each industry provides greater diversification benefits than only equally weighting the constituents of an underlying index. In addition, equal-weighting at security level offers a straightforward weighting methodology undistorted by security prices or market capitalisation.
- 1.1.2 The Russell Equal Weight Index Series does not take account of ESG factors in its index design.
- 1.1.3 The base currency of the benchmark is US Dollars. Index values may also be published in other currencies.

### 1.2 Available indices

The following indices are available for the Russell Equal Weight Index Series:

- Russell 1000 Equal Weight Index
- Russell 2000 Equal Weight Index
- Russell Midcap Equal Weight Index
- Russell Top 200® Equal Weight Index
- Russell 1000 Equal Weight ICB Industry level Indexes
- Russell 2000 Equal Weight ICB Industry level Indexes
- Russell 1000 Growth Equal Weight Index
- Russell 1000 Value Equal Weight Index
- Russell Midcap Growth Equal Weight Index
- Russell Top 50 Mega Cap Equal Weight Index
- Russell Top 500 Equal Weight Index

#### Constituent Level Equal Weight Indices

- Russell Top 50 Mega Cap Constituent Equal Weight Index
- Russell Top 500 Constituent Equal Weight Index
- Russell 1000 Constituent Equal Weight Index
- Russell 1000 Growth Constituent Equal Weight Index
- Russell 2000 Constituent Equal Weight Index
- Russell Midcap Constituent Equal Weight Index
- Russell Top 200 Constituent Equal Weight Index
- Russell Magnificent 7 Constituent Equal Weight Index

### **1.3 FTSE Russell**

- 1.3.1 FTSE Russell is a trading name of FTSE International Limited, Frank Russell Company, FTSE Global Debt Capital Markets Limited (and its subsidiaries FTSE Global Debt Capital Markets Inc., FTSE Fixed Income LLC, FTSE (Beijing) Consulting Limited).
- 1.3.2 FTSE Russell hereby notifies users of the index series that it is possible that circumstances, including external events beyond the control of FTSE Russell, may necessitate changes to, or the cessation of, the index series and therefore, any financial contracts or other financial instruments that reference the index series or investment funds which use the index series to measure their performance should be able to withstand, or otherwise address the possibility of changes to, or cessation of, the index.
- 1.3.3 Index users who choose to follow this index series or to buy products that claim to follow this index series should assess the merits of the index's rules-based methodology and take independent investment advice before investing their own or client funds. No liability whether as a result of negligence or otherwise is accepted by FTSE Russell for any losses, damages, claims and expenses suffered by any person as a result of:
- any reliance on these Ground Rules, and/or
  - any inaccuracies in these Ground Rules, and/or
  - any non-application or misapplication of the policies or procedures described in these Ground Rules, and/or
  - any inaccuracies in the compilation of the index or any constituent data.

## Section 2

# Management responsibilities

---

## 2. Management responsibilities

### 2.1 FTSE International Limited

2.1.1 FTSE is the benchmark administrator of the index series<sup>1</sup>.

2.1.2 FTSE Russell is responsible for the daily calculation, production and operation of the index series and will:

- maintain records of the index weightings of all constituents;
- make changes to the constituents and their weightings in accordance with the Ground Rules;
- carry out the periodic index reviews of the index series and apply the changes resulting from the reviews as required by the Ground Rules;
- publish changes to the constituent weightings resulting from their ongoing maintenance and the periodic reviews;
- disseminate the indices.

### 2.2 Amendments to these Ground Rules

2.2.1 These Ground Rules shall be subject to regular review (at least once a year) by FTSE Russell to ensure that they continue to best reflect the aims of the index series. Any proposals for significant amendments to these Ground Rules will be subject to consultation with FTSE Russell advisory committees and other stakeholders if appropriate. The feedback from these consultations will be considered by the FTSE Russell Index Governance Board before approval is granted.

---

<sup>1</sup> The term administrator is used in this document in the same sense as it is defined in [Regulation \(EU\) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds](#) (the European Benchmark Regulation) and [The Benchmarks \(Amendment and Transitional Provision\) \(EU Exit\) Regulations 2019](#) (the UK Benchmark Regulation).

## Section 3

# FTSE Russell Index policies

---

## 3. FTSE Russell Index policies

These Ground Rules should be read in conjunction with the following policy documents which can be accessed through the links below:

### 3.1 Corporate actions and events guide

3.2 Full details of changes to constituent companies due to corporate actions and events can be accessed in the corporate actions and events guide for non-market cap weighted indices through the following link:

[Corporate Actions and Events Guide for Non Market Cap Weighted Indices.pdf](#)

### 3.3 Queries and complaints

3.3.1 FTSE Russell's complaints procedure can be accessed through the following link:

[Benchmark Determination Complaints Handling Policy.pdf](#)

### 3.4 Index policy for trading halts and market closures

3.4.1 Guidance for the treatment of index changes in the event of trading halts or market closures can be found through the following link:

[Index Policy for Trading Halts and Market Closures.pdf](#)

### 3.5 Index policy in the event clients are unable to trade a market

3.5.1 Details of FTSE Russell's treatment can be accessed through the following link:

[Index Policy in the Event Clients are Unable to Trade a Market.pdf](#)

### 3.6 Recalculation policy and guidelines

3.6.1 Where an inaccuracy is identified, FTSE Russell will follow the steps set out in the FTSE Russell Index recalculation guidelines when determining whether an index or index series should be recalculated and/or associated data products reissued. Users of Russell Equal Weight Index Series will be notified through appropriate media.

For further information refer to the FTSE Russell recalculation policy and guidelines document which is available from the FTSE Russell website through the link below or by contacting [info@ftserussell.com](mailto:info@ftserussell.com).

[Recalculation Policy and Guidelines Equity Indices.pdf](#)

### 3.7 Policy for benchmark methodology changes

3.7.1 Details of FTSE Russell's policy for making benchmark methodology changes can be accessed through the following link:

[Policy for Benchmark Methodology Changes.pdf](#)

### **3.8 FTSE Russell Governance framework**

- 3.8.1 To oversee its indices, FTSE Russell employs a governance framework that encompasses product, service and technology governance. The framework incorporates the London Stock Exchange Group's three lines of defence risk management framework and is designed to meet the requirements of the IOSCO Principles for Financial Benchmarks<sup>2</sup>, the European benchmark regulation<sup>3</sup> and the UK benchmark regulation<sup>4</sup>. The FTSE Russell Governance framework can be accessed through the following link:

[FTSE Russell Governance Framework.pdf](#)

### **3.9 Real Time Status Definitions**

- 3.9.1 Please refer to the following guide for details of real time status definitions for indices which are calculated in real time.

[Real Time Status Definitions.pdf](#)

---

<sup>2</sup> IOSCO Principles for Financial Benchmarks Final Report, FR07/13 July 2013.

<sup>3</sup> Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds.

<sup>4</sup> The Benchmarks (Amendment and Transitional Provision) (EU Exit) Regulations 2019.

## Section 4

# Construction and methodology

## 4. Construction and methodology

- 4.1.1 Each quarter, each industry<sup>5</sup> in the parent index, e.g., Russell 1000, is allocated an equal weight (i.e.,  $1/N$ , where  $N$  is the number of industries in the index). Next, each constituent within each industry is assigned an equal weight within that industry (i.e.,  $1/n$ , where  $n$  is the number of constituents within the industry).
- 4.1.2 The industry equal weight described in rule 4.1.1 does not apply to the Constituent Level Equal Weight Indices.
- 4.1.3 A capacity screen is then applied to the securities in the Russell Equal Weight Indices. Capacity is defined as the total amount that can theoretically be invested in a company. For a security that has 100% of its shares freely available, the maximum capacity is defined as the total market capitalisation of that security. To be eligible for membership, the share position of a potential constituent cannot exceed 5% of the float-adjusted shares of a company when a notional value of \$5 billion is assumed to be invested in the portfolio<sup>6</sup>.
- 4.1.4 If the parent index includes multiple share classes for a given company, only the primary share class will be included in the index, i.e., each company will have only one share class represented in the Russell Equal Weight Indices.
- 4.1.5 For the Russell Magnificent 7 Constituent Equal Weight Index, there is no parent index. The underlying composition (which shall be treated as its parent index) includes the following seven companies: Alphabet, Amazon, Apple, Meta Platforms, Microsoft, NVIDIA, and Tesla.
- 4.2 Quarterly index re-weighting and annual reconstitution**
  - 4.2.1 Index reviews will use stock prices T-7 from the effective date of the index review (7 refers to seven business days).
  - 4.2.2 The Russell Equal Weight Indices are re-weighted at the close of the third Friday of the month in March, September, and December. June's re-weighting is completed at the same time as the annual reconstitution of the parent indices.
- 4.3 Corporate action-driven changes**
  - 4.3.1 The members of the Russell Equal Weight Indices are proactively maintained to reflect daily changes in the US equity market as a result of corporate actions.
  - 4.3.2 Full details of changes to constituent companies due to corporate actions and events can be accessed in the corporate actions and events guide for non-market cap weighted indices through the following link:  
[Corporate Actions and Events Guide Non Market Cap Weighted Indices.pdf](#)
  - 4.3.3 If a security's industry classification changes following a corporate action event (e.g. spin-off), it will be assigned to the appropriate industry during the implementation of the corporate action. This also applies to regular, non-corporate action related industry re-classifications.

<sup>5</sup> The Russell Equal Weight Index Series moved from the Russell Global Sectors (RGS) classification system to the ICB classification system in September 2020.

<sup>6</sup> After securities' weights are reset, they may change as often as daily as stock prices fluctuate.

#### 4.4 How the capacity screen is applied

- 4.4.1 To understand the effects of the capacity screen, take a hypothetical nine-industry index with 30 constituent securities. The industry weight for each constituent is defined as  $1/N$ , where  $N$  is the number of industries in the index – in other words, constituent weight is the industry weight divided by the number of constituents in the industry. In the example provided, the constituent weight of Company B is equal to 11.1% divided by 2.
- 4.4.2 A notional value of \$5 billion is assumed to be invested in the portfolio.
- 4.4.3 The price of each security is then taken at the quarterly re-weighting date and its notional share position is calculated by dividing the portfolio value by the price of the security.
- 4.4.4 If the ratio of the notional share amount to the float adjusted shares of the security is greater than 5%, the security is removed from the equal weight index.
- 4.4.5 In the example provided, the highlighted companies (Company D, Company E, Company U, Company AD) are removed from the hypothetical equal weight index.

Company	Industry	Weight for each industry	# of constituents in industry	Constituent weight	Portfolio value*	Price	Shares held in portfolio	Float adjusted shares	% of float adjusted shares
Company A	Consumer discretionary	11.1%	2	5.56%	277,777,778	23	12,077,295	120,772,946,860	0.0%

## Section 5

# Industry classification benchmark (ICB)

---

## 5. Industry classification benchmark (ICB)<sup>7</sup>

### 5.1 Classification structure

- 5.1.1 The Russell Equal Weight Index Series constituents are classified into industries, supersectors, sectors and subsectors, as defined by the industry classification benchmark (ICB).
- 5.1.2 Details of the ICB are available from FTSE Russell and published on the FTSE Russell website (<https://www.lseg.com/en/ftse-russell>) and can be accessed through the following link:  
[Industry Classification Benchmark](#)

---

<sup>7</sup> The Russell Equal Weight Index Series moved from the Russell Global Sectors (RGS) classification system to the ICB classification system in September 2020. Russell US related indices migrated to the new ICB classification system in September 2020.
