MONTHLY REPORT – OCTOBER 2023 | LOCAL CURRENCY EDITION

FOR PROFESSIONAL INVESTORS ONLY

Stock rally sputters in Q3 as hopes for early rate relief evaporate

Global stocks ended Q3 in retreat, trimming year-to-date advances, as central banks (led by the Fed) vowed to maintain their fight against inflation, dampening hopes for a policy pivot any time soon and eroding ‘soft landing’ optimism. Energy and financials were among a few industries to make a positive contribution, while defensives and growth-tilted sectors suffered the biggest declines.

Global Asset Classes – ‘Soft landing’ optimism fades

Most equity markets finished Q3 with losses, as government bond yields surged. Oil prices soared on OPEC-induced supply concerns, but copper and other commodities fell amid renewed global growth worries. The gold rally also lost steam. (page 3)

Global Equities – UK & Japan fare best; US small caps suffer major sell-off

Stocks in the UK and Japan ended Q3 higher, while peers elsewhere fell, particularly in Europe and the US. US small caps did worst of all. YTD, Japan and the US remained the top performers, while Asia Pacific and the Emerging index ranked at the bottom. (page 4)

Industry returns – Energy stocks ride the oil-price boom

Energy and financials were among the few bright spots in most markets; defensives and growth-heavy groups fared the worst. (page 5)

Alternative Indices – Broad underperformance

Environmental Opportunities lagged in Q3, hurt by energy-stock outperformance, while Core Infrastructure and most regional REITs also underperformed, weighed down by surging interest rates. FTSE4Good generally outperformed. (page 8)

Factor performance – Value takes the prize

Value and Yield were the best performers globally, buoyed by outperforming energy & financial stocks. Low Vol also held its own. (page 9)

Foreign Exchange – US dollar regains footing

Surging US Treasury yields drove a broad-based rally in the US dollar in Q3, particularly vs the pound sterling, yen and euro. However, some commodity-sensitive currencies (notably the Norwegian krone and South African rand) held up relatively well. (page 10)

Appendix - Asset Class Risk/Returns (3-Year and 5-Year Annualised), Correlation, Regional Performance and Country Exposures.

Market Overview — Third Quarter 2023

Q3 Highlights

Most equity markets ended Q3 in the red, as slowing progress in taming inflation, soaring oil prices and continued hawkish central-bank rhetoric stoked 'higher for longer' interest-rate fears and eroded 'soft landing' hopes. The prospects of a possible US government shutdown added to investor nervousness in late September.

Long government bond markets also ended Q3 broadly lower, while high-yield credit held up better than investment grade equivalents. Ten-year government yields continued to surge in September, hitting new year-to-date highs in the US and Eurozone. Yield curves remained inverted across the largest developed markets but flattened significantly as yields rose more at the long end than at the short end.

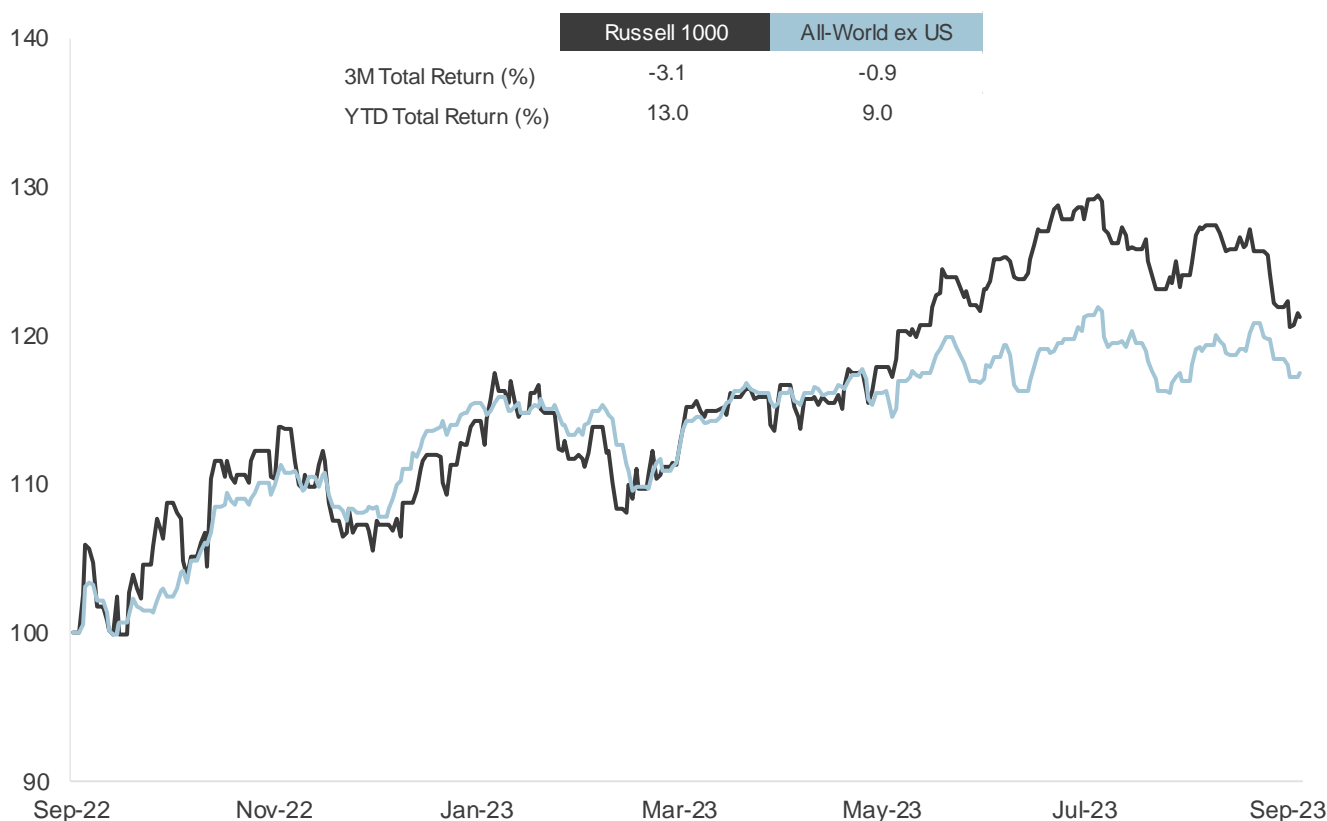

The US dollar eked out further gains against most major currencies in September, extending its rally for the quarter, particularly vs the pound sterling, yen and euro. Commodity-sensitive currencies fared best vs the USD in September, particularly the New Zealand and Canadian dollars and Norwegian krone (also see page 10).

Oil prices soared in Q3, while copper and other commodity prices weakened amid China growth worries. The gold rally continued to lose traction as officials at developed market central banks remained steadfast in their goal to get inflation back to target.

Main Market-Moving Events in September

- US unemployment rises to 3.8% (Aug) vs 3.5% (July); 187K jobs added; avg hourly wage growth slows to 4.3% YoY vs 4.4%.
- China's exports fall 8.8% (Aug) after 14.5% drop in July; imports fall 7.3% after 12.3% decline in prior month.
- German industrial production slips 0.8% (July), after downward revised 1.4% drop in June.
- United Auto Workers union launches targeted strikes against three US automakers.
- US headline CPI rises to 3.7% YoY (Aug) vs 3.2% (July); core eases to 4.3% vs 4.7%.
- Fed keeps rates unchanged; raises GDP growth forecasts for 2023 and 2024; lowers core PCE forecasts to 3.7% from 3.9% estimate in June; sees inflation hitting 2% target in 2026.
- China CPI rises 0.1% YoY (Aug) vs drop of 0.3% in July.
- PBoC keeps benchmark rates unchanged, as expected, amid fresh signs of economic stabilization and weakening yuan.
- UK CPI slows to 6.7% YoY (Aug) vs 6.8% (July); core eases to 6.8% vs 6.9%.
- Eurozone CPI slips to 5.2% YoY (Aug) vs 5.3% (July); core at 5.3% vs 5.5%.
- BOE and Swiss National Bank leave policy rates unchanged.
- ECB adopts "dovish" 25 bps rate hike.
- September flash PMI composite output eases in the US to 50.1 vs 50.2 (August), to 46.8 vs 48.6 in the UK, to 51.8 vs 52.6 in Japan, and was flat at 47.1 vs 46.7 in the Eurozone.
- The US averts a government shutdown with short-term funding bill signed by President Biden on September 30.

Russell 1000 vs All-World ex US Indices (LOCAL, TR, Rebased)

Asset Class Returns – 3M & YTD (LC, TR %)

Key Observations – Third Quarter 2023

Most equity markets finished Q3 in the red as investors digested the likelihood of 'higher-for-longer' interest rates. The UK and Japan bucked the global downtrend, while stocks elsewhere fell, particularly in developed Europe and the US. US small caps did worse of all, significantly lagging their large-cap peers. The Emerging index was roughly flat for the period, bolstered mostly by strong rebounds in Pakistan and India. Japan and the US retained their YTD leadership, while Asia Pacific and EM ranked at the bottom (see page 4).

Government 7-10-year bonds broadly retreated in Q3 (except in the UK and China), led by a significant sell-off in US Treasuries. European and US high-yield bonds posted gains in Q3, outperforming their investment-grade and EM counterparts, which ended flat or sharply lower. Short-dated US and UK inflation-linked bonds rose, while longer-dated (10yr+) counterparts posted losses.

The US dollar rebounded against most major currencies in Q3, more than reversing July losses vs the pound sterling, yen and euro. Helped by renewed strength in September, however, the commodity-sensitive Norwegian krone and South African rand rose versus USD for the period. (also see page 10).

While oil price soared more than 28% in Q3 amid supply worries, copper and other commodities weakened as concerns about global demand increased. Gold reversed course in Q3, falling nearly 3% on the back of higher rate expectations.

Regional Industry-Weighted Contributions to Returns – 3M (LC, TR %)

Key Observations – Third Quarter 2023

- Positive contributions from energy and financials were overwhelmed by deficits elsewhere, led by growth-tilted stock groups.
- In the US, small gains in energy and financials were more than offset by losses in technology, discretionary and industrials.
- In the UK, energy and materials contributed strongly, with losses coming only in staples, discretionary and utilities. In Europe, gains in financials and energy were overwhelmed by losses in other industries, led by discretionary, industrials and technology.
- Financials and discretionary led gains in Japan, offset by small deficits in industrials, health care and technology. In Asia Pacific, only financials and energy added value, while telecoms and industrials led the detractors.

Energy and financials were unscathed in the global Q3 rout; defensives and growth-tilted industries suffered most.

Tech dominates in the US; financials are largest in the UK, Europe and Asia Pac, and industrials is tops in Japan.

© 2023 London Stock Exchange Group plc and its applicable group undertakings (the "LSE Group"). The LSE Group includes (1) FTSE International Limited ("FTSE"), (2) Frank Russell Company ("Russell"), (3) FTSE Global Debt Capital Markets Inc. and FTSE Global Debt Capital Markets Limited (together, "FTSE Canada"), (4) FTSE Fixed Income Europe Limited ("FTSE FI Europe"), (5) FTSE Fixed Income LLC ("FTSE FI"), (6) The Yield Book Inc ("YB") and (7) Beyond Ratings S.A.S. ("BR"). All rights reserved.

FTSE Russell® is a trading name of FTSE, Russell, FTSE Canada, FTSE FI, FTSE FI Europe, YB and BR. "FTSE®", "Russell®", "FTSE Russell®", "FTSE4Good®", "ICB®", "The Yield Book®", "Beyond Ratings®" and all other trademarks and service marks used herein (whether registered or unregistered) are trademarks and/or service marks owned or licensed by the applicable member of the LSE Group or their respective licensors and are owned, or used under licence, by FTSE, Russell, FTSE Canada, FTSE FI, FTSE FI Europe, YB or BR. FTSE International Limited is authorised and regulated by the Financial Conduct Authority as a benchmark administrator.

All information is provided for information purposes only. All information and data contained in this publication is obtained by the LSE Group, from sources believed by it to be accurate and reliable. Because of the possibility of human and mechanical error as well as other factors, however, such information and data is provided "as is" without warranty of any kind. No member of the LSE Group nor their respective directors, officers, employees, partners or licensors make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to the accuracy, timeliness, completeness, merchantability of any information or of results to be obtained from the use of FTSE Russell products, including but not limited to indices, data and analytics, or the fitness or suitability of the FTSE Russell products for any particular purpose to which they might be put. Any representation of historical data accessible through FTSE Russell products is provided for information purposes only and is not a reliable indicator of future performance.

No responsibility or liability can be accepted by any member of the LSE Group nor their respective directors, officers, employees, partners or licensors for (a) any loss or damage in whole or in part caused by, resulting from, or relating to any error (negligent or otherwise) or other circumstance involved in procuring, collecting, compiling, interpreting, analysing, editing, transcribing, transmitting, communicating or delivering any such information or data or from use of this document or links to this document or (b) any direct, indirect, special, consequential or incidental damages whatsoever, even if any member of the LSE Group is advised in advance of the possibility of such damages, resulting from the use of, or inability to use, such information.

No member of the LSE Group nor their respective directors, officers, employees, partners or licensors provide investment advice and nothing in this document should be taken as constituting financial or investment advice. No member of the LSE Group nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indices cannot be invested in directly. Inclusion of an asset in an index is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

The information contained in this report should not be considered "research" as defined in recital 28 of the Commission Delegated Directive (EU) 2017/593 of 7 April 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council ("MiFID II") and is provided for no fee.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index was officially launched. However, back-tested data may reflect the application of the index methodology with the benefit of hindsight, and the historic calculations of an index may change from month to month based on revisions to the underlying economic data used in the calculation of the index.

This document may contain forward-looking assessments. These are based upon a number of assumptions concerning future conditions that ultimately may prove to be inaccurate. Such forward-looking assessments are subject to risks and uncertainties and may be affected by various factors that may cause actual results to differ materially. No member of the LSE Group nor their licensors assume any duty to and do not undertake to update forward-looking assessments.

No part of this information may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the applicable member of the LSE Group. Use and distribution of the LSE Group data requires a licence from FTSE, Russell, FTSE Canada, FTSE FI, FTSE FI Europe, YB, BR and/or their respective licensors.
