Recalculation policy and guidelines – multi-asset indexes

FTSE Russell multi-asset index recalculation policy

This document sets out the FTSE Russell\(^1\) Multi-Asset Index Recalculation Policy. This policy and the Recalculation Guidelines below apply only to those multi-asset indices where the relevant index ground rules and other methodology documents indicate that this policy and the guidelines apply. Multi-asset indices are generally comprised of underlying equity and fixed income indexes calculated by FTSE Russell – their Recalculation Policy and Guidelines are available from the FTSE Russell website using the below links or by contacting info@ftserussell.com.

Fixed Income Recalculation Policy and Guidelines.pdf

FTSE Russell makes every effort to maintain its indices to high standards. However, investors, licensees and other market participants should be aware that inaccuracies may arise in the calculation of index level and/or constituent data of underlying indexes from time to time.

Where an inaccuracy is identified, FTSE Russell will follow the steps set out in the FTSE Russell Index Recalculation Guidelines – Multi-Asset Indices below when determining whether an index or index series should be recalculated and/or associated data products reissued as a result of an inaccuracy. Because of the unpredictable nature of the issues that could arise, these guidelines should not be construed as definitive rules that determine the steps FTSE Russell will take whenever an inaccuracy is identified. In addressing inaccuracies, FTSE Russell reserves the right to consult market participants in complex cases as to the appropriate course of action, including the decisions on whether to recalculate indices and/or reissue its associated data products.

Please note that FTSE Russell does not accept any responsibility to investors, licensees or other market participants for the accuracy of the index or its constituent data and accepts no liability for any losses, damages, claims or expenses suffered by any person as a result of any errors or inaccuracies in the compilation or calculation of the index or any constituent data, whether arising as a result of negligence or otherwise.

**Table 1: FTSE Russell multi-asset index recalculation guidelines**

Table 1 below sets out the general guidelines that FTSE Russell will follow when determining whether an index or index series should be recalculated and/or associated data products reissued.

In interpreting these guidelines, FTSE Russell may use expert judgement taking into account all relevant factors including, but not limited to: the asset class of the index constituents; the nature of the incident; the impact on the total return of each index; the rebalance frequency of the index; the time elapsed since the incident occurred; the implications for products known to track the index; and the impact on index users should a recalculation and/or reissue take place. Because the individual circumstances of an incident may be complex, FTSE Russell reserves the right to recalculate, or not to recalculate, an index when these general guidelines might suggest otherwise.

\(^1\) FTSE Russell is a trading name of FTSE International Limited, Frank Russell Company, FTSE Global Debt Capital Markets Limited (and its subsidiaries FTSE Global Debt Capital Markets Inc. and FTSE Fixed Income Europe Limited), FTSE Fixed Income LLC and The Yield Book Inc.
If a decision to recalculate an index is taken, all affected indexes will also be recalculated. Following such an event, index users will be notified of the products affected through standard communication channels (including the publication of a FTSE Russell technical notice). Index values will be updated on the FTSE Russell website, and associated data products will be reissued.

If an inaccuracy is discovered prior to client delivery, the index will be recalculated and clients will be notified of any delay to file deliverables.

<table>
<thead>
<tr>
<th>Category</th>
<th>Example issue</th>
<th>Action</th>
<th>Index recalculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Restatement of Underlying Index</td>
<td>A component fixed income, equity or cash index to a multi-asset composite is restated</td>
<td>Recalculate</td>
<td>Y</td>
</tr>
<tr>
<td>Error in Calculation of Multi-Asset Index Return</td>
<td>Total return or periodic returns calculated incorrectly</td>
<td>Recalculate</td>
<td>Y</td>
</tr>
<tr>
<td></td>
<td>Incorrect weight applied to the return of each underlying index</td>
<td>Recalculate</td>
<td>Y</td>
</tr>
</tbody>
</table>

Generally, the impact will be assessed with respect to the impact on standard indices. FTSE Russell will exercise its expert judgement when determining where a custom index, an index linked to an exchange traded product, or a standard sub-index should be recalculated.
