## Notes:

Climate Risk-Adjusted GBI Series: FTSE Russell Climate Risk-Adjusted Government Bond Index Series.

FTSE Russell Climate Risk-Adjusted Government Bond Index Series Scores are specific to the considered universe: for example, WGBI (or WGBI ex Japan) country scores are specific to the WGBI universe and different from EGBI country scores.

Wtd avg method: Sum of weighted average (Wtd avg or WA) contributions based on the considered metric. Contributions are calculated for each country based on (i) the weight of the considered country in the index, multiplied by (ii) the considered metric's value applicable to this country. Weights are rebased to 100% if some values are missing.

Year of SI Data: Year of the SI data applied to the analysis (for example, the year of available greenhouse gas emissions applied in a given analysis, corresponding to the year during which these GHG emissions have been emitted).

Date of SI Dataset: Date of the SI dataset (snapshot) from which the SI data are selected (for example, greenhouse gas emissions applicable to a given analysis could be retrieved from an SI dataset as of the 1st February of the year, or the 31st October of the previous year).

## GHG (Greenhouse Gas Emissions) Scopes:

Above carbon exposures are based on CO2, CH4, N2O, HFCs, PFCs, SF6, and include emissions from LULUCF (Land Use, Land-Use Change and Forestry).

Territorial GHG: GHG emitted on the territory of the country.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index and/or rate returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index or rate inception date is back-tested performance. Back-tested performance is not actual performance, but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index or rate was officially launched. However, back-tested data may reflect the application of the index or rate methodology with the benefit of hindsight, and the historic calculations of an index or rate may change from month to month based on revisions to the underlying economic data used in the calculation of the index or rate.

This document may contain forward-looking assessments. These are based upon a number of assumptions concerning future conditions that ultimately may prove to be inaccurate. Such forward-looking assessments are subject to risks and uncertainties and may be affected by various factors that may cause actual results to differ materially. No member of LSEG nor their licensors assume any duty to and do not undertake to update forward-looking assessments.
