Regulatory framework
The post-trade workflow of data archiving and storing is necessary, complex and costly. Regulation is forcing the front and back offices to demonstrate efficient record-keeping and operational automation. But liquidity fragmentation and changes in market structure are making collection and storage of trading data an increasingly challenging process.

In an environment of limited technology budgets and cost reduction across the post-trade infrastructure, can you risk any compliance slipups?

Managed cloud-based service
Hosted privately by LSEG FX, Deal Tracker® Service is a comprehensive, secure archiving and compliance solution. Data storage is on infrastructure hosted privately by LSEG FX, rather than on infrastructure deployed at the customer site. Deal Tracker Service can help eliminate the need for on-premise hardware, trade archive database and IT management overheads, allowing the firm to focus on its core business.

Using a cloud-based solution for post-trade processing has efficiency benefits. Additionally, Deal Tracker Service allows operations and compliance users to monitor trade activity in real time, review and track exceptions, and generate reports from archive data with easy trade query searches — all from an intuitive user interface.

Deal Tracker Service includes trade notifications from LSEG FX Conversational Dealing, Matching, brokers and bank portals, capturing activity across liquidity venues.

With Deal Tracker Service, you will benefit from:
- **Security and reliability:** Accessed through Workspace log-in, with data storage hosted privately by LSEG FX for a secure and reliable experience
- **Venue agnostic:** Combine multiple LSEG and third-party FX liquidity venues to ensure a comprehensive view of all trading data
- **Intuitive:** Allows regional back-office teams to view aggregated data, as well as to impose local controls in line with their business models
- **Light touch:** A simplified infrastructure enables quicker setup, a streamlined user experience and easier maintenance
LSEG FX offers the world’s leading independent source of trusted FX market insight, interbank and dealer-to-client electronic trading venues, workflow management, and post-trade and regulatory support for both sell-side and buy-side market participants.

The LSEG FX portfolio includes:

**FXall**
Dealer-to-client trading and workflow solutions for more than 2,300 institutions worldwide, including asset management firms, banks, broker-dealers, corporations and hedge funds, with liquidity from more than 200 bank and non-bank market makers.

**Workspace**
Pre-trade analytics, news, pricing and other expert insight to help inform trading strategies and decisions. Workspace provides access to indicative market rates, currency indices and FX benchmarks.

**Matching**
Anonymous central limit order book for spot and FX swaps trading for the dealer-to-dealer community, with over 1,000 subscribers and spot matching in over 80 currency pairs.

**Electronic Trading**
Powerful e-commerce solutions adopted by over 300 banks across 60 countries to shape, configure and automate FX price flows, whilst streamlining risk management to meet the growing demand for electronification.

**Conversational Dealing**
Global professional trading community, including more than 4,000 organisations and 14,000 users in more than 120 countries.

Advanced Dealing is a technical and functional enhancement to our already-popular Conversational Dealing. Furthermore, it is a key strategic element of our FX strategy, centered on Workspace for FX Trading. Advanced Dealing brings together Messenger and Dealing communities to deliver Collaborative Trading workflow.

**Compliance Archive**
Reconstruct, supervise and analyse your message and trade activity in an efficient and compliant way, in one unifying portal.

Ask our experts today to see how we can help you achieve post-trade efficiency.

**About LSEG FX**
LSEG FX is the world’s leading independent source of trusted FX market insight, interbank and dealer-to-client electronic trading venues, workflow management, and post-trade and regulatory support for both sell-side and buy-side market participants.

** Connectivity:** Allows users to archive and store all post-trade data, with easy and quick access for search and querying when needed

**Reduce operational risk**
With on-premise post-trade infrastructure, maintaining multiple inbound sources can be challenging. Risks can increase manifold with multiple points of failure or remote locations unable to access the central system in an optimal manner.

**Deal Tracker Service** can alleviate such concerns with consolidated access and real-time monitoring of all trading data. It provides back-office operations staff with better ways of organising incoming trades, with an effective workflow for reviewing, validating and highlighting exceptions.

**Connectivity:** Allows users to archive and store all post-trade data, with easy and quick access for search and querying when needed.
