

# Workspace for sales desks

In today's highly fragmented and increasingly scrutinized FX market, sales desks need platforms that offer effective tools for customer collaboration, market monitoring, price distribution and customer order management – supported by complete post-trade solutions.

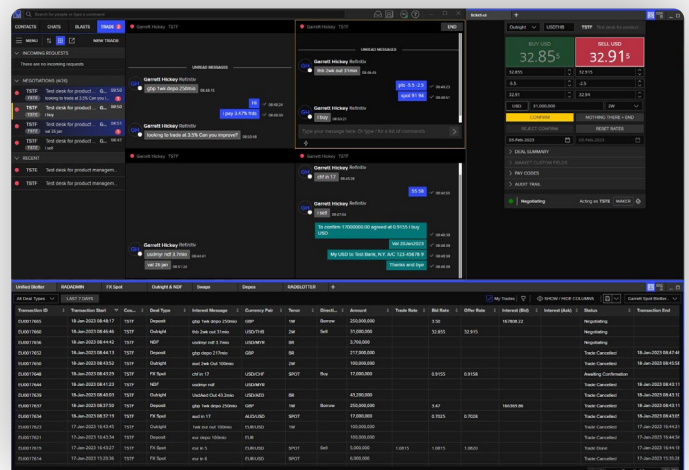

Thousands of customers around the world trust LSEG's award-winning transactions platforms to trade more than US\$420 billion in average daily volume.

Workspace is an innovative desktop platform designed to deliver the value of the entire LSEG and LSEG FX offering to the global professional FX community.

## Workspace: Key benefits for sales desks

- Trade confidently with the market's most trusted independent provider of FX trading solutions
- Collaborate with the world's largest global professional FX community. It features over 14,000 **Conversational Dealing** users, 2,300 **FXall®** buy-side liquidity takers and 300,000 **Workspace Messenger** contacts
- Advanced Dealing is a technical and functional enhancement to our already-popular Conversational Dealing. Furthermore, it is a key strategic element of our FX strategy, centered on Workspace for FX Trading. Advanced Dealing brings together Messenger and Dealing communities to deliver Collaborative Trading workflow.
- Efficiently execute client trade requirements with powerful order management tools for limit and batch orders

- Leverage advanced execution management capabilities, including aggregation, price distribution, algorithms and auto-hedging
- Streamline your workflow with a comprehensive end-to-end solution that offers market-leading compliance, straight-through processing, confirmations, settlement and trade history reports
- Comply with regulatory trade requirements through our regulated trading venues, the **Swap Execution Facility (SEF)** and the **Multilateral Trading Facility (MTF)**, as well as our global trade reporting service
- Gain timely access to new functionality and other enhancements facilitated by simplified, software-based product delivery with no proprietary hardware requirements
