FX Trading, Fully Integrated

LSEG Workspace with FXall: 5 key advancements for Asset Managers

As market complexity grows and the pressure to outperform increases, Asset Managers are taking a fresh look at how FX fits into the broader investment process. LSEG Workspace with FXall brings trusted execution capabilities into a single, integrated platform — so you can move from insight to execution without missing a beat.

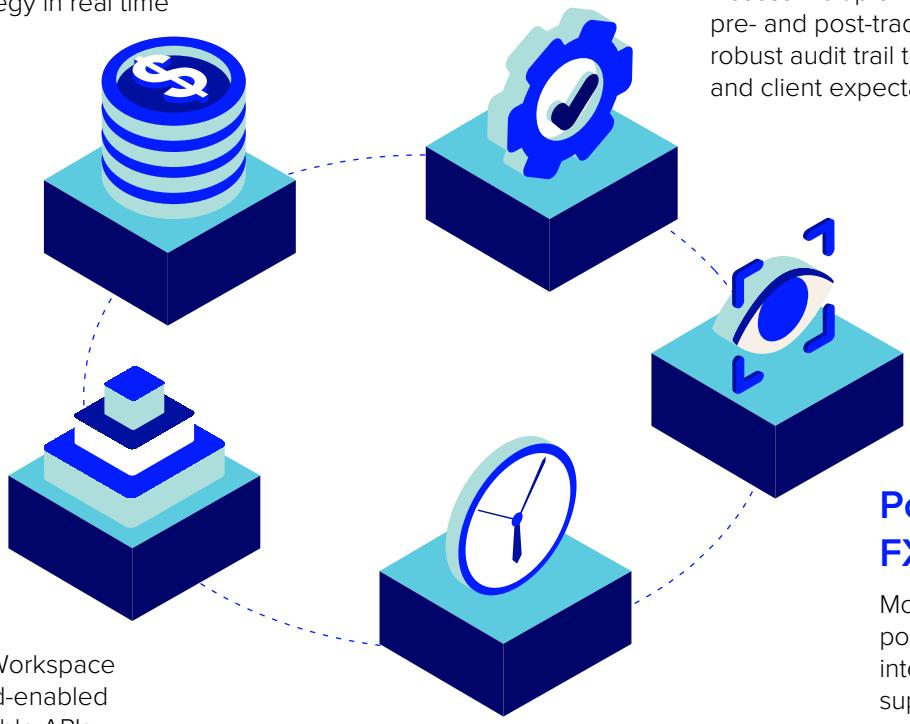
What transforms how Asset Managers remove friction from day-to-day FX trading?

Integrated Investment Workflow

Trade FX alongside research, news and analytics — aligning execution with portfolio strategy in real time

Enhanced Best Execution & Transparency

Access multiple liquidity providers, pre- and post-trade TCA. Create a robust audit trail to meet regulatory and client expectations



Scalable Platform for Growth

Built with LSEG's ecosystem. LSEG Workspace with FXall is a cloud-enabled platform. It has flexible APIs, and various integrated tools covering data, analytics, reporting plus, end to end trading which supports clients across their entire workflow

Portfolio-Level FX Oversight

Monitor FX exposure across portfolios in real time, with integrated analytics to support smarter hedging and risk management

Operational Efficiency at Scale

Streamlined workflows and seamless OMS/EMS integration reduce manual processing and operational risk

LSEG FX

Ready to see what's possible? LSEG Workspace with FXall can streamline your FX workflows and strengthen investment outcomes.
