

# Reinforce your trade surveillance workflows

## Trade Surveillance for FX

Reinforce your trade surveillance workflows – built on a breadth of high-quality, trusted FX data.

Access innovative insights into trading behaviour, across market abuse and financial crime, with LSEG Trade Surveillance for FX

### The challenge

Organisations around the world need to find increasingly sophisticated ways to identify market abuse and financial crime to comply with jurisdictional market abuse regulations.

If you're a market surveillance practitioner, it can be very challenging to operate in markets without consolidated orderbooks that are enormously complex and largescale, and where all credit is bilateral.

Designing solutions in a non-issuance market, where supply is effectively infinite, poses a huge challenge in building market abuse regulatory analytics that are fit for purpose.

Many organisations do not have capacity or budget to build in-house, FX specific, surveillance solutions. And many current solutions are inefficient, costly, and generate large numbers of false positives.

### LSEG Trade Surveillance for FX solves these issues for you

### The solution

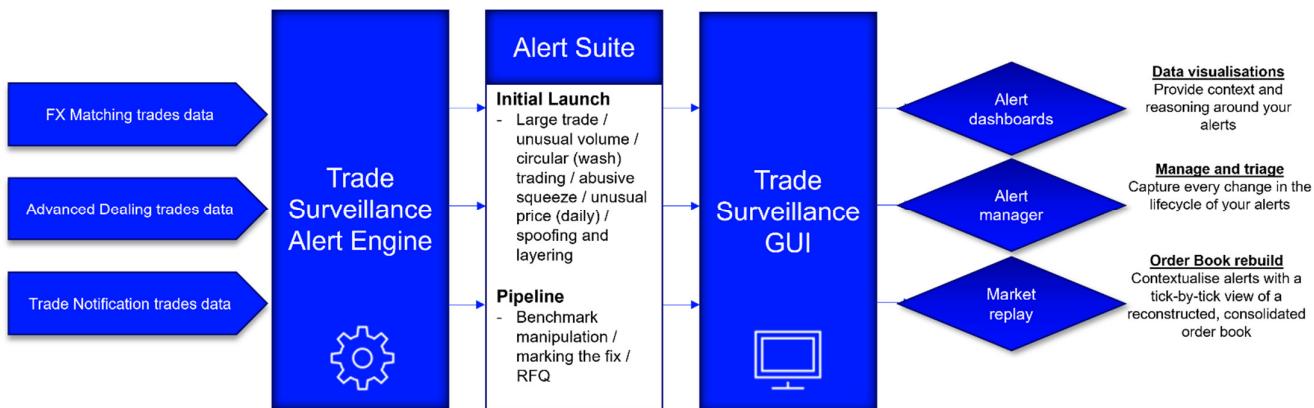

LSEG Trade Surveillance for FX innovatively solves these challenges, providing a multi-market surveillance tool for spot FX participants trading on LSEG's Dealing, Advanced Dealing and Matching platforms, as well as those trading on third-party venues captured by LSEG's Trade Notification network.

Trade Surveillance provides you with the capability to view your private trades against our public Spot Matching data feed, plus a range of alerts to help you assess and manage regulatory risk.

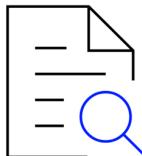

LSEG's quantitative surveillance team has deep knowledge and expertise in building surveillance analytics for FX. Unlike many trade surveillance providers that may recycle alerts built for the equities markets across other asset classes, our FX specialists have built alerts specific to this market.

We keep things simple - creating alerts that are based on existing datasets and a transparent methodology.

## How it works

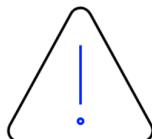

## Key capabilities

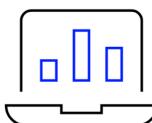

### Capitalise on your private trading data

Receive powerful alerts based on a combination of your private trade data and LSEG's public Spot Matching market data feed, to alert you to potentially unusual activity, and monitor for market abuse. Our methodology is similar to that used by global regulators to identify potential market abuse.

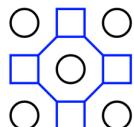

### Behavioural anomaly detection alerts

Behavioural anomaly detection alerts highlight unusual trader behaviour, providing you with better insights into your traders' or clients' activity. The analytics provided may also contribute to wider investigations led by your AML and sanctions teams.

### Replay the market

Use our market replay tool to get a unique view of your position against the Spot Matching public market data feed.

### Plug and play

Get instant access to your alerts and analytics through a secure web-based GUI. Zero installation and integration, and minimal setup required.

LSEG FX offers the world's leading independent source of trusted FX market insight, interbank and dealer-to-client electronic trading venues, workflow management, and post-trade and regulatory support for both sell-side and buy-side market participants.

## Discover our FX solutions

### **Venues**

Accessing trusted trading venues is critical to achieve and maintain your success, as regulatory and market conduct requirements for FX professionals increase. Find out how our venues can support your trading and reporting activities in this changing marketplace
