SERVICE ANNOUNCEMENT

001/08092026

London Stock Exchange and TRADEcho – New CDS MFT Portal URL

The purpose of this Service Announcement is to inform customers of a **new CDS portal URL for the LSEG Managed File Transfer (MFT) service**. The MFT service is used for the secure delivery of data and enables customers to upload and download files for the following services:

- London Stock Exchange Short Codes/Long Code (RTS24)
- London Stock Exchange Venue Transaction Reporting for Third Country Members
- London Stock Exchange Restricted Instrument List (Sponsored Access)
- TRADEcho SIX Swiss Reports
- TRADEcho Transaction Reporting
- TRADEcho CSV Upload via SFTP
- TRADEcho End of Day Reports

New CDS MFT Portal

New Portal URL: https://mft-webclient.lseg.com

The new CDS MFT portal replaces the existing CDS MFT portal. While the portal URL is changing, there are **no changes to the underlying MFT service, functionality, user experience, or supported services**. Customers will continue to upload, download, and manage files in the same way as they do today, using their existing MFT credentials.

To support a smooth transition, both the existing and new portals are now available until **2 October 2026**.

Existing Portal URL, https://mft-test.lseg.com will be **decommissioned on 2 October 2026**.

Customers who currently use the existing portal for file uploads, downloads, or password reset activities should begin using the new portal at their earliest convenience.

There is no action required other than updating any references to the existing portal URL, including:

- Browser bookmarks or saved links
- Automated scripts or system configurations
- Internal documentation and operating procedures
- Any other references to https://mft-test.lseg.com

SFTP Transfers Are Not Impacted

Customers using mft-test.lseg.com for SFTP transfers on port 22 can continue to use the existing hostname. There is no change to SFTP connectivity, and no action is required for SFTP file transfers.

However, if you use the MFT portal to reset the password associated with your SFTP account, you will need to use the new portal for password reset activities going forward.

The Connectivity Guide (MIT 1001), available within the London Stock Exchange technical library; Technical Library Securities | London Stock Exchange, has been updated to reflect this change.
