

Agreement Manager

Optimize your legal agreement workflow and data

Agreement Manager is part of the AcadiaPlus Agreements suite of services. AcadiaPlus is a feature rich open platform for collateral, margin and risk mitigation serving Sell-side, Buy-side and Fund Administrators.

Acadia is changing the way that you manage your legal agreement data. Agreement Manager enables the centralization and standardization of legal agreement data within your firm and across the marketplace. It provides an authoritative record of legal agreements and data through common standards and a single workflow while facilitating instant access to key legal data via one cost effective interface.

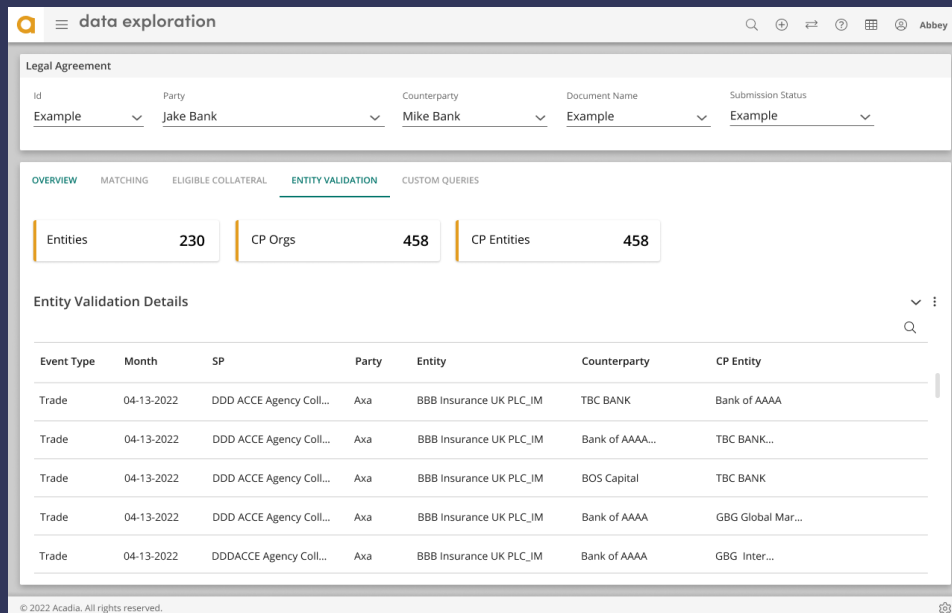

Key Features

- Integrates with negotiation, digitization and collateral management partners across a common, shared, industry-wide platform all accessed via one interface
- Normalization of data enables import from or export to all downstream party and counterparty applications and industry service providers
- Supports backloading via adaptors or digitization enabling validation of internal and external records and a simpler, more efficient dispute resolution process
- Minimizes mis-mapped legal entity data by ensuring accurate linkage of legal agreement data to your collateral and margin agreements already in existence and utilized within Acadia
- View and compare which legal clause underpins a data attribute extracted from the document (side by side/ data vs. actual document viewer)
- Facilitates the reconciliation and affirmation of legal agreement data from multiple sources within your own firm or across your counterparties to create a single record of key legal and operational data
- Seamlessly integrates to Acadia's InForce Service (and other applications within the Acadia platform) to facilitate legally binding changes to key collateral operational data points such as Reg IM Threshold and MTA
- Allows for updating key operating parameters between counterparties via InForce

Key Benefits

- Reduce financial exposure by expediting agreement capture, amendment and creation
- Unlocks legal and operational data to enhance front to back processes which assess cost implications associated with changes to legal documents
- Reduces agreement driven disputes by resolving data representation differences and establishing golden records
- Common source of data to feed all interested parties/systems
- Reduces operational risk by leveraging a standard and consolidated workflow
- Increased transparency and control
- Significantly reduces operational costs
- Source agnostic consolidation of legal agreement data
- Basic Service available as part of your AcadiaPlus Subscription

NEW: Dashboards now available

Empower your team to analyze agreement data

- Our new Data Exploration (DX) dashboards provide a flexible, fast and powerful view across all your agreement data. Search queries enable precise analysis and filtering provides multiple views across key data attributes
- Ability to read across digitized data within documents
- Analyse and filter the content of your backlog documents
- Export data to supplement internal reporting tools
- Gain insights into fund relationships and quickly uncover which investment managers are managing specific funds
