

LSEG™ World-Check® Customer Risk Screener APP

Simplify and accelerate the due diligence process

Accessing your customer database just got a whole lot easier

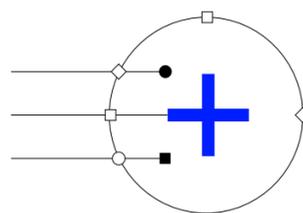

The LSEG™ World-Check® Customer Risk Screener app provides an easy and intuitive way to connect customer data held within Salesforce with Refinitiv™ World-Check®.

The app simplifies the customer experience by using technology and intelligence.

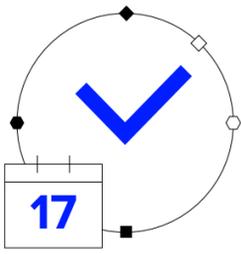

More precision, less noise

World-Check enables greater customisation and control at name-matching level to screen against specific lists or data sets, which improves the capability to identify and monitor risk.

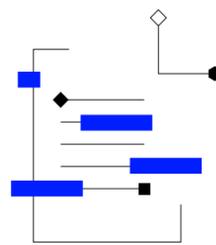

Fewer false positive

Multiple secondary identifiers in World-Check data, combined with configurable name-matching algorithms and the filtering technology of LSEG™ World-Check® One, minimise false positives.

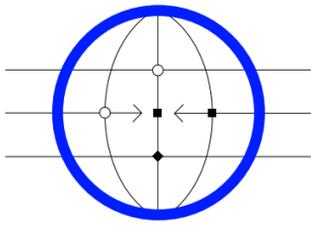

Audit capabilities

World-Check Customer Risk Screener provides full auditing capability, with date-stamped actions for all users and administrators involved in the match remediation process.

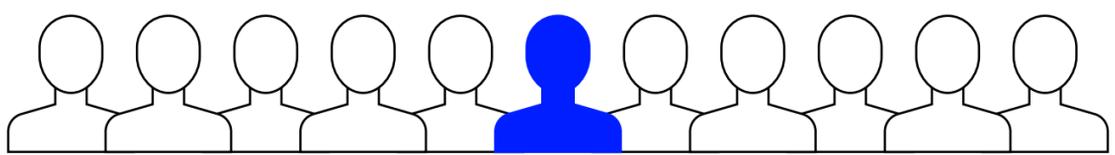

Integrated workflow

The app performs due diligence checks and ongoing screening from within your contact list in Salesforce. You can escalate high-profile matches to senior analysts, and keep track of risk remediation and compliance reviews, all in one place.

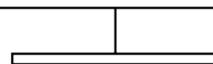

Access on the move

Risk screening against World-Check can be performed at any location.

World-Check Customer Risk Screener seamlessly integrates a trusted screening solution into your daily Salesforce workflow to help you know exactly who you're doing business with, everywhere you do business.

World-Check Customer Risk Screener is available directly from your desktop or mobile Salesforce workflow.
