DCPs

Re:

T2S Release 3.0 – CR612 XSD notice

Dear Client,

We have received and posted an official communication dated 12/03 from the ECB concerning the CR-612 and in particular the versions of dictionaries published.

Essentially, the final version dictionaries published by ECB for the entire community refer to the ISO20022:2004 standard, while the dictionaries used by ECB to adapt T2S refer to the ISO20022:2013 standard.

Despite the version difference, the ECB and SWIFT report that no impact has been detected at the level of message structure, mandatory/optional fields, repetitive blocks, data types names, or at the level of validation and message management in T2S.

In view of this situation, the T2S project decision makers have decided that no new dictionaries will be released for community use. Accordingly, the version published on 16 January 2019 on SWIFT's MyStandards portal for the T2S community remains valid.

Relevant documentation

The official ECB communication is posted in the document section of MT-X, in the path HOME > Documentation > T2S - Change Management and Client Test Plan > T2S Releases > T2S Release 3.0
