## Market Data Transparency Obligation Disclosures 2018

### 1.0 Introduction

Article 11, “Transparency obligation”, of Commission Delegated Regulation (EU) 2017/567 of 18 May 2016, as published in the Official Journal of the European Union on 31 March 2017, requires that “*Market operators and investment firms operating a trading venue and systematic internalisers shall disclose the price and other terms and conditions for the provision of the market data in a manner which is easily accessible to the public*” and makes requirements on the contents of this disclosure.

This document covers all of the relevant disclosures for London Stock Exchange plc (“London Stock Exchange”) in connection with such transparency obligation, with the exception of current price lists and related terms and conditions, with the latter including the notice period for any changes to the fees. As detailed below, these are available at [www.londonstockexchange.com](http://www.londonstockexchange.com), in the London Stock Exchange Real Time Market Data Price List and the London Stock Exchange Real Time Market Data Agreement respectively.

All data generated from the trading systems operated by London Stock Exchange is collated and developed before being distributed via vendors or directly to end-users, as detailed in the London Stock Exchange Real Time Market Data Agreement.

### 2.0 Contents of Disclosures

#### Current price lists

Current price lists for London Stock Exchange are publically accessible on the Real Time Data pages of the website at <http://www.londonstockexchange.com/products-and-services/market-data/realtimedata/pricesandpolicies/pricesandpolicies.htm>

## Information on how the price was set including the cost accounting methodologies

Costs are apportioned in line with the methodology described in this document.

**London**  
Stock Exchange Group

## Background

London Stock Exchange is owned by the London Stock Exchange Group plc (“LSEG”) and the Market Data business sits within LSEG’s Information Services division.

The cost accounting methodology reflects the advice of external subject matter experts, engaged to understand industry best practice, to help form the cost allocation model to be used by LSEG and its subsidiaries (“Group”).

## Methodology

Costs are grouped in three categories: direct costs, indirect costs and joint costs.

Direct costs are specifically incurred to run London Stock Exchange’s Market Data business. These costs are allocated in total to the Market Data business and they are not shared with other business areas.

Indirect costs represent the internal services that are incurred to run London Stock Exchange’s Market Data business. These are aggregated in cost pools and assigned allocation drivers, which in turn allow their costs to be shared by the Group’s revenue generating businesses.

Joint costs are incurred to run concurrently with the Market Data and Trading businesses on the basis that these are jointly produced services and it is not possible to offer one service without the other.

### *Direct costs:*

The following are the key direct costs for the London Stock Exchange Market Data business:

- **Staff costs**
- **Third party information services fees**
- **Subscription fees**
- **Professional fees**
- **Depreciation and amortisation**
- **Market Data technology platform operating costs**

### *Indirect costs:*

The following are the key indirect costs allocated to the London Stock Exchange Market Data business:

- **Property costs**
- **IT infrastructure costs**
- **Divisional support function costs**
- **Group support function costs**

### *Joint costs:*

London Stock Exchange Trading and Market Data businesses provide jointly produced services: a single technology platform facilitates both trading activity and data production and it is not possible to offer one service without the other.

London Stock Exchange allocates platform costs equally between its Trading and Market Data businesses.
