CDS Release Note

1 November 2012

Codeset: 1.0.7.0

Issue Identifier	Title	Description
GTP-413	Gateway failover	On failure of the Primary gateway all messages sent are resent by the Secondary gateway. This should not be the case and only messages not sent prior to component failure should be sent.

- Clients should also note, as per GTP001 – Product Guide, **FTSE Low Latency** is not yet available on our CDS environment. Availability of this service line to test will be communicated in due course.
