London Stock Exchange-Upgrade of BTS application and connectivity details update.

Upgrade of BTS application and connectivity details update

Further to the Technical Notice sent on 2 August 2017, the purpose of this Notice is to inform members that a newly updated version of the **LSEDM102 – Connectivity Guide** is available from the London Stock Exchange Derivatives [website](#). This has been updated to reflect the new BTS Production IP addresses and port details as a result of the hardware upgrade.

In conjunction with these changes members will be required to upgrade their existing BTS GUI application. This is a mandatory upgrade of the BTS GUI as it will not be backwards compatible. New versions of BTS GUI are available on the Borsa Italiana website to download for testing in the Customer Development Service (CDS) environment.

<http://www.borsaitaliana.it/borsaitaliana/gestione-mercati/bts-bittradingstation/bts.en.htm>.

The final go-live BTS GUI version will be available in due course. The planned go-live is Monday 13 November 2017. Members who wish to migrate to the new GUI before this date or who require more information should contact their Technical Account Manager or the Technical Account Management Team on +44 (0) 20 7797 3939 or londontam@lseg.com.
