Greenhouse Gas Verification Statement Number
CCP200852/2021/02/08

The inventory of Greenhouse Gas emissions in the period
01/01/2020 – 31/12/2020 for
London Stock Exchange Group plc

10 Paternoster Square
London
EC4M 7LS

has been verified in accordance with ISO 14064-3:2006 as
meeting the requirements of:

The Greenhouse Gas Protocol – A Corporate
Accounting and Reporting Standard

To represent a total amount of:
137,047 tCO₂e

For the following activities
International financial data exchange group operating various offices and data
centres across the world.

on pages 2 to 4 of this Statement.
Schedule Accompanying Greenhouse Gas Verification Statement
Number CCP200852/2021/02/08

Brief Description of Verification Process
SGS has been contracted by London Stock Exchange Group plc for the verification of
direct and indirect carbon dioxide (CO₂) equivalent emissions as provided by
London Stock Exchange Group, 10 Paternoster Square, London, EC4M 7LS, in
their GHG Assertion in the form of a Directors' and Strategic Review Report
covering CO₂ equivalent emissions.

The management of London Stock Exchange Group plc is responsible for the
organization's GHG information system, the development and maintenance of
records and reporting procedures in accordance with that system, including the
calculation and determination of GHG emissions information and the reported GHG
emissions.

It is SGS' responsibility to express an independent GHG verification opinion on the
emissions as provided in the London Stock Exchange Group plc GHG Assertion for
the period 01/01/2020 – 31/12/2020.

SGS conducted a third-party verification following the requirements of ISO 14064-3:
2006 of the provided CO₂ equivalent assertion during November 2020 to February
2021.

The assessment included a desk review of the GHG Assertion and supporting data
presented. The verification was based on the verification scope, objectives and
criteria as agreed between London Stock Exchange Group and SGS on 21/11/2019

Level of Assurance
The level of assurance agreed for the assignment is a limited level of assurance

Scope
London Stock Exchange Group has commissioned an independent verification by
SGS of reported CO₂ equivalent emissions arising from their global activities, to
establish conformance with the requirements of WRI/WBCSD GHG Protocol within
the scope of the verification as outlined below. Data and information supporting the
CO₂ equivalent assertion were historical in nature and proven by evidence.

This engagement covers verification of emissions from anthropogenic sources of
greenhouse gases included within the organization's boundary and meets the
requirements of WRI/WBCSD GHG Protocol.

- The organizational boundary was established following the operational control
approach.
- Title or description of activities: financial services.
- Location/boundary of the activities: Global operations.
- Physical infrastructure, activities, technologies and processes of the
organization: Offices, data centres, vehicle fleet.
- GHG sources, sinks and/or reservoirs included:
  Scope 1 - Stationary combustion, mobile combustion, fugitive emissions;
  Scope 2 – Purchased electricity;
  Scope 3 – Categories include:
  1. Purchased goods and services
  2. Fuel- and Energy-Related Activities
  3. Waste generated in operations
  4. Business Travel
  5. Employee commuting
  6. Upstream leased assets
- GHG sources, sinks and/or reservoirs excluded.
- Scope 1 - fugitive emissions from all sites other than 3 locations which include this category in their reports, 
and fire extinguishers Types of GHGs included (where applicable): CO₂, N₂O, CH₄, HFCs, PFCs, SF₆.
- Directed actions: none.
- GHG information for the following period was verified: 01/01/2020 – 31/12/2020.
- Intended user of the verification statement: internal, customers, stakeholders, general public.

Objective
The purposes of this verification exercise are, by review of objective evidence, to independently review:
- Whether the CO₂ equivalent emissions are as declared by the organization's CO₂ equivalent assertion.
- That the data reported are accurate, complete, consistent, transparent and free of material error or omission.

Criteria
Criteria against which the verification assessment is undertaken are the requirements of WRI/WBCSD GHG Protocol.

Materiality
The materiality required of the verification was considered by SGS to be below 10%, based on the needs of the intended user of the GHG Assertion.

Conclusion
London Stock Exchange Group plc provided the GHG assertion based on the requirements of WRI/WBCSD GHG Protocol. The GHG information for the period 01/01/2020 – 31/12/2020 disclosing gross emissions of 137,047 metric tonnes of CO₂ equivalent are verified by SGS to a limited level of assurance, consistent with the agreed verification scope, objectives and criteria.

Scope 1 Emissions 2,670 tCO₂e
Scope 2 Emissions (market based) 0 tCO₂e
Scope 2 Emissions (location based) 14,279 tCO₂e

Scope 3 Emissions 134,377 tCO₂e

Total emissions per m² 0.86 tCO₂e
Total emissions per FTE 23.43 tCO₂e

Total emissions per m² and total emissions per FTE are based on Scope 1,2 (market based) and scope 3 emissions and reflect RECs purchase for all standard grid electricity in 2020.

Total gross emissions are based on Scope 2 market-based emissions. Scope 2 market-based net zero emissions are reported due to the purchase of electricity using renewable supply tariffs, combined with the remaining 17,462 tCO₂e (location based) claimed as renewable electricity through the purchase of appropriate energy attribute certificates (EACs) from the relevant markets for the consuming country/entity.

SGS' approach is risk-based, drawing on an understanding of the risks associated with modeling GHG emission information, and the controls in place to mitigate these risks. Our examination included assessment, on a sample basis, of evidence relevant to the voluntary reporting of emission information.

SGS concludes with limited assurance that no evidence has been found that the presented CO₂ equivalent assertion is not materially correct and is not a fair representation of the CO₂ equivalent data and information and is prepared following the requirements of WRI/WBCSD GHG Protocol.
We planned and performed our work to obtain the information, explanations and evidence that we considered necessary to provide a limited level of assurance that the CO₂ equivalent emissions for the period 01/01/2020 – 31/12/2020 are fairly stated.

This statement shall be interpreted with the CO₂ equivalent assertion of London Stock Exchange Group as a whole.

Note: This Statement is issued, on behalf of Client, by SGS United Kingdom Ltd, Rossmore Business Park, Inward Way, Ellesmere Port, Cheshire, CH65 3EN ("SGS") under its General Conditions for GHG Validation and Verification Services. The findings recorded hereon are based upon an audit performed by SGS. A full copy of this statement and the supporting GHG Assertion may be consulted at London Stock Exchange Group plc website (www.lsgp.com). This Statement does not relieve Client from compliance with any bylaws, federal, national or regional acts and regulations or with any guidelines issued pursuant to such regulations. Stipulations to the contrary are not binding on SGS and SGS shall have no responsibility vis-à-vis parties other than its Client.
