
Technical Notice

20 June 2017

Certification Policy Update

The purpose of this notice is to inform customers of important changes to London Stock Exchange Group's certification policy. The following changes are applicable from 1 July 2017.

Currently, customers are required to test software applications at least twice per year per venue with at least one being a full certification test. The new policy will no longer mandate the number of tests which need to be completed within the year. Instead, firms will need to complete a certification test whenever any changes are made to the trading venue's or member's software.

The policy change is reflected in the Guide to Application Certification for the various markets.

The certification policy covers London Stock Exchange Equities and Fixed Income, LSEDM Equity Derivatives and Interest Rate Derivatives Markets, Turquoise, all Borsa Italiana Markets (MTA, MOT, SedeX, ETF Plus and IDEM), EuroTLX, GTP, MITCH and HSVF Market Data Service and TRADEcho.
