
Technical Notice

9 March 2017

Millennium Functional Release 9.1 Go-Live – 3 April 2017

The purpose of this announcement is to confirm the go-live date of the new Millennium Exchange functional release as **3 April 2017** pending completion of internal testing and customer readiness activities.

1.0 Changes with this release

The changes being introduced are as follows:

- Message length increased of the Native Cancel message
- Changes to MinQty behaviour
- Adding tag 851 – LastLiquidityIndicator to FIX Execution Reports
- **Turquoise Plato Uncross™** identifier on MITCH Trade messages

Members are advised to refer to the updated Turquoise Technical Specifications and Service Descriptions for full details of the changes. The updated versions of the specifications are available at the following link under the heading “Next Functional Release”:

<http://www.lseg.com/markets-products-and-services/our-markets/turquoise/information-centre/document-library>

2.0 Certification Requirements

Mandatory certification is required for Members using the Native Protocol. Members using other protocols will be required to perform certification testing only if they have made changes to the applications to support the new release in accordance with the London Stock Exchange Groups certification policy.
