SUBJECT:

Multi-browser solution for MT-X and X-TRM Online platform

Dear client,

Monte Titoli is pleased to inform you that support for MT-X and X-TRM Online platform will be soon enhanced to include to the main browsers and not only Internet Explorer.

By specific, the enhancement will allow our clients to access MT-X and X-TRM Online with the following solutions of browser and operating system:

- Internet Explorer 7 (IE7) for Windows XP;
- IE8 for Windows XP, Windows 7 (32 and 64 bit) and Windows Vista (32 and 64 bit);
- IE9 for Windows 7 (32 and 64 bit) and Windows Vista (32 and 64 bit);
- IE10 for Windows 8;
- Mozilla Firefox for Windows 7 (32 bit);
- Google Chrome for Window 7 (a 32 bit).

Please take note that IE6 will not be supported anymore; we suggest using IE8 or the upgrade to IE7.

Thanks to the upgrade on the supported browsers, the new release of MT-X and X-TRM Online platform will also include new functionalities as below detailed:

❖ MT-X

- reports will be re-projected with a new graphic interface and it will be possible to sort by changing the order or the position of a column; a better performance in data uploading and browsing will be experienced;
- a graphic re-style will affect announcements and issuers' mandates together with a change in the menu bar

❖ X-TRM Online

- change in the menu bar;
- graphic re-style of sections.

MT-X will also be equipped with the option to separate the “maker” and the “checker”; this option, only if activated by the client's administrator, will allow the approval of an instruction only by a user other than the one who created it.

The option will be available either for clients and for account operators.

The new release of MT-X and X-TRM Online platform will be ready for testing since 17 December; during the first period of testing only a “pilot test” will take place.

A subsequent announcement will confirm the open test session.
