

CurveGlobal Markets - Alternative Site Recovery Test – 22 February 2020 – Reminder

The purpose of this Technical Notice is to remind customers of the upcoming Alternative Site Recovery (ASR) Test for CurveGlobal Markets, scheduled for **Saturday 22 February 2020**.

Please see the second page of this announcement for a schedule of the day's activities and additional information.

The test involves simulating a disruption to the live service serious enough to warrant a controlled shutdown of the systems at London Stock Exchange's Primary Site, followed by subsequent recovery of systems at the Alternate Site. The aim of this exercise is to test the following:

- the technical process of recovery and sequence of events during this process
- the process of suspension and restoration of the market
- the communications between London Stock Exchange and participants during recovery
- the ability of participants to connect to the Alternate Site and trade as normal
- London hosted customers are also invited to participate in the ASR test. This will simulate a local platform issue and allow customer traffic routing between our primary site and our secondary site
- London Stock Exchange will undertake some intraday reference data actions which will include the suspension and/or restoration of instruments.

Whilst this test is not mandatory, all clients are strongly recommended to participate as it provides the opportunity to familiarise themselves with London Stock Exchange's ASR recovery procedures, and to confirm that their systems are able to connect to the Alternate Site and process the relevant messages generated by the above actions.

Services Available

The following services will be available for testing in the ASR:

- SAIL Trading
- FIX Trading
- SAIL Drop Copy
- FIX Drop Copy
- HSVF TCP Market Data
- BTS

Reference data files will not be generated for the ASR test. Clients are advised to use Friday's reference data files which are available on the FTP server.

The ASR test is expected to follow the schedule described in the table below.

Time (GMT)	Description
07:30 onwards	Logon to all Primary Gateways at PDC is available.
08:00 – 09:00	All markets open. Trading and market data are available.
09:00 – 11:00	Disaster invoked. All markets closed. Trading stops and market data ceases. Access to CurveGlobal Markets at PDC is disabled. Invocation of SDC begins.
11:00 onwards	Logon to all Secondary Gateways at SDC is available.
12:00 – 13:30	All markets open. Trading and market data are available via the Secondary Gateways only. Participants are requested to submit orders for execution.
13:30	All markets closed. Access to CurveGlobal Markets at SDC is disabled and rollback to PDC begins.

Please note that all times shown in the schedule above are indicative and are subject to change on the day. Confirmation of when the Gateways will be available for clients to connect to at SDC, and any changes to the schedule will be posted on the Weekend Activity Monitor.

Please note that, after SDC has been invoked, customers will only be able to connect to the Production IP addresses marked as “Secondary” in the CurveGlobal Markets Connectivity Guide (see link below).
