

# CurveGlobal Markets - Alternative Site Recovery Test – 22 February 2020

---

The purpose of this Technical Notice is to provide clients with notification of an Alternative Site Recovery (ASR) Test for the London Stock Exchange, CurveGlobal Markets, TRADEcho, Group Ticker Plant and Turquoise, scheduled for **Saturday 22 February 2020**.

The test involves simulating a disruption to the live service serious enough to warrant a controlled shutdown of the systems at London Stock Exchange's Primary Site, followed by subsequent recovery of systems at the Alternate Site. The aim of this exercise is to test the following:

- the technical process of recovery and sequence of events during this process
- the process of suspension and restoration of the market
- the communications between London Stock Exchange and participants during recovery
- the ability of participants to connect to the Alternate Site and trade as normal
- the simulation of a local platform issue (for London hosted customers), allowing customer traffic routing between our primary site and secondary site
- intraday reference data actions which will include the suspension and/or restoration of instruments.

Whilst this test is not mandatory, all clients are strongly recommended to participate as it provides the opportunity to familiarise themselves with ASR recovery procedures of the respective markets, to confirm that their systems are able to connect to the Alternate Site and process the relevant messages generated by the above actions.

More information and the schedule of the ASR test will be provided in a document closer to the test date.
