

Turquoise - Group Ticker Plant Connectivity Weekend - 22 April 2017

Following the publication of the Technical Notice on 5 April 2017, the optional connectivity weekend will take place on Saturday 22 April 2017, prior to the launch of Turquoise Group Ticker Plant in production on Monday 24 April 2017.

The connectivity window is scheduled Saturday morning from 10:00 to 11:00 BST. During that time, customers will be able to connect their production systems to the new production GTP gateways. Heartbeats will be generated on all Turquoise multicast channels and customers will be able to logon to the Turquoise GTP production unicast Replay/Recovery services with their production IDs.

Customers should note that data generated by internal testing may be disseminated on the multicast channels before 10:00. Please note after a successful logon to unicast services, if replay or recovery requests are sent, these may be accepted and successfully processed and GTP test data may be replayed/recovered as a result of earlier internal testing.

Any messages received on multicast channels or recovered from the unicast services should be ignored and discarded.

Registration

Customers are required to register their participation by contacting their Technical Account Manager or the Technical Account Management team.

- Telephone: +44 (0) 20 7797 3939
- Email: londontam@lseg.com
