

# New Reference Service - Update

---

The purpose of this notice is to confirm the decommission date of the legacy Turquoise FTP/SFTP services. As previously communicated on 17 July 2015, Turquoise has upgraded its reference data service to a new environment. The new FTP/SFTP services have been running in parallel with the legacy services to allow participants time to complete their migration.

Participants are advised that the legacy FTP/SFTP services will be decommissioned on **Friday 30 October 2015**. Participants should ensure all migration activities are completed prior to this date.

The reference data files provided on the Turquoise website are not impacted and will remain available to participants on the existing page.

Participants should confirm their readiness via email to their Technical Account Manager or the Technical Account Management team at [londontam@lseg.com](mailto:londontam@lseg.com).

Technical details can be found in the new version of TQ501 Guide to Reference Data Services (version 3.2). <http://www.lseg.com/markets-products-and-services/our-markets/turquoise/information-centre/document-library>
