
Technical Notice

5 February 2018

Alternate Site Recovery Test – Saturday 17 February 2018

The purpose of this technical notice is to provide clients with notification of an Alternate Site Recovery (ASR) Test for Turquoise, London Stock Exchange, TRADEcho and Group Ticker Plant scheduled for **Saturday 17 February 2018**.

The test involves simulating a disruption to the live service serious enough to warrant a controlled shutdown of the systems at Turquoise's Primary Site, followed by subsequent recovery of systems at the Alternate Site. The aim of this exercise is to test the following:

- the technical process of recovery and sequence of events during this process
- the process of suspension and restoration of the market
- the communications between Turquoise and participants during recovery
- the ability of participants to connect to the Alternate Site and trade as normal
- Turquoise will undertake some intraday reference data actions which will include the suspension and/or restoration of instruments.

Whilst this test is not mandatory, all clients are strongly recommended to participate as it provides the opportunity to familiarise themselves with Turquoise's ASR recovery procedures, and to confirm that their systems are able to connect to the Alternate Site and process the relevant messages generated by the above actions.

More information and the schedule of the ASR test will be provided in a document closer to the test date. In order for customers to familiarise themselves with the site recovery procedures, please see Section 2.6 of TQ102 – Turquoise Equities Connectivity Guide at the following link:
