Turquoise on OpenFin™ - Proof of Concept (POC) Launch

The **Turquoise on OpenFin™** application is a Proof of Concept (POC), which will allow users to receive a subset of live Turquoise® and Turquoise Europe™ data into their test environment. Turquoise plans to launch the POC in August 2021 (subject to successful testing). The **Turquoise on OpenFin™** POC environment will be available and supported for at least 2 months.

Users should *not* implement this service into their production environment until Turquoise has launched the service into Production, details of which will be announced via a Turquoise Notice.

Turquoise on OpenFin™ is based on publication of **Turquoise Plato Uncross™** trades and aggregated trade data; most of which originate from **Turquoise Plato Block Discovery™** and occur within the **Turquoise Plato Order Book™**.

The **Turquoise on OpenFin™** Proof Of Concept Technical Description can be found in the Turquoise Document Library, Next Functional Release section:

<http://www.lseg.com/markets-products-and-services/our-markets/turquoise/information-centre/document-library>.

The Technical Description will provide guidance to using OpenFin™, to consume Turquoise's streaming data service of **Turquoise Plato Uncross™** trade data.

Those users who have applications developed within an OpenFin™ environment or are starting from scratch without existing OpenFin™ development will be able use the **Turquoise on OpenFin™** Proof Of Concept Technical Description document to consume streaming **Turquoise Plato Uncross™** trade data.

Turquoise® and Turquoise Europe™ market data made available via OpenFin™ is waived of any licence fees for Non-Display or Display use when used within the receiving system. The market data must not be redistributed. Should firms wish to redistribute the market data, [Information Licence Agreement\(s\)](#) will be required.

For any feedback or queries about this document please contact sales@tradeturquoise.com.
