

## Millennium Functional Release 9.1

---

### Millennium Functional Release 9.1 - Technical Specifications

The purpose of this announcement is to advise members of a new Millennium Exchange functional release. Production go-live dates will be announced in due course.

Members are advised that the Turquoise CDS environment will be closed on 27 January 2017 to upgrade the environment. The new functionalities will be available to customers in the Turquoise CDS environment from **30 January 2017**.

#### 1.0 New Functionality

The changes being introduced are as follows:

- Message length increased for the Native Cancel and Cancel Reject messages
- Changes to MinQty behaviour
- Adding tag 851 – LastLiquidityIndicator to FIX Execution Reports
- **Turquoise Plato Uncross™** identifier on MITCH Trade messages

Members are advised to refer to the updated Turquoise Technical Specifications and Service Descriptions for full details of the changes. The updated versions of the specifications are available at the following link under the heading “Next Functional Release”:

<http://www.lseg.com/markets-products-and-services/our-markets/turquoise/information-centre/document-library>

#### 2.0 Certification Requirements

Mandatory certification is required for Members using the Native Protocol. Members using other protocols will be required to perform certification testing only if they have made changes to the applications to support the new release in accordance with the London Stock Exchange Groups certification policy.
